Faculty of Sciences

Since King Louis the Great founded the first Hungarian University in Pécs in 1367, the city has functioned as an educational center of the country and the region with longer and shorter interruptions. With its 25,000 students and 500 different study programs the University of Pécs (UP), the oldest university in Hungary, is one of the largest institutions of higher education in the country. The highly qualified academic staff is a guarantee that students are provided with the most up-to-date knowledge to the highest, internationally recognized standards and so earn a degree, which is highly competitive in today's labor market.

The University has conducted degree programs in English for more than 40 years and so has become one of the most internationalized universities in Hungary. We are proud to host over 5,500 international students coming from 146 countries of the world.

Besides being the oldest university in the country, the University of Pécs has earned a prominent position in terms of international excellence as well. The entire institution, as well as many of our faculties and study programs took leading positions in highly recognized international rankings.

The University of Pécs functions as a knowledge center for innovation in the South Transdanubian Region. Nearly 2,000 teaching and research staff members participate in research projects at our 10 faculties. 22 doctoral schools offer PhD and DLA degrees that cover a wide spectrum of sciences.

The university at a glance

PÉCS ranked **14th** among Europe's best student cities
(The Campus Advisor, 2024)

Ranked as the **BEST Hungarian University** in two categories: learning experience and international students.

Study in Hungary

Basic information

Official name:

Hungary
(in Hungarian: Magyarország)

Official language:

Hungarian

Form of state:

Parliamentary republic

Capital:

Budapest (population: 1.7 million)

Area:

93,030 km²

Population:

9.9 million

Neighboring countries:

Austria, Slovakia, Ukraine, Romania,
Serbia, Croatia, Slovenia

Time zone:

Central European Time (GMT+1)

EU accession:

1 May 2004

Currency:

Forint (HUF)

Hungary is a beautiful landlocked EU country situated in the Carpathian Basin, in the middle of the continent. Despite being rather small, its beneficial Central European position makes the country an appealing destination to live, work or study. Hungary has much to offer for visitors, from the architectural and cultural delights of historic cities, to vineyard-covered hills, freshwater lakes and therapeutic mineral springs. This small country is one of the oldest in Europe where 2000-year-old Roman ruins and 400-year-old Turkish monuments can be found side by side.

Hungarian higher education has represented academic excellence for more than 650 years. The country's first university was founded in Pécs in 1367, around the same time as other Central European universities, such as those in Prague, Cracow and Vienna.

Hungary is a member of the European Union, NATO, OECD, the Visegrad Group and the Schengen Convention.

Zagreb (180km)

Pécs

City of Pécs

Pécs has been an important cultural and educational center since the Roman era, proud of its diverse past and present.

On the Footsteps of History:

Memories of bygone millennia determine the unique atmosphere of the city. The UNESCO World Heritage Site of the Early Christian Necropolis is only a few minutes' walk away from the mosque, a memento of the Ottoman era, all encircled by the longest continuous medieval castle wall of Central Europe.

A City of Peace and Diversity:

Pécs has always hosted a diverse population, one proud of their different languages, religions and culture. The populous Croatian and German nationalities, in particular, have played an important role in the city's past and present alike. They are very open to international students of the University of Pécs, who come from over 146 countries. As such, the city has become a melting pot of cultures and earning itself the nickname "the borderless city".

Nightlife and Entertainment:

Throughout the year, Pécs is a hive of activity. Be it attending cultural events celebrating history, art and music or enjoying in the revelry of Király Street with its menagerie of bars and restaurants of every size, flavor and style; there is always something to be enjoyed amongst the company of friends.

Weather:

Pécs has a temperate climate with a snowy, cold winter and a sunny, hot summer, ranging from minimum -5 °C in winter to maximum +30 °C in summer. It also has beautiful autumn and spring seasons. In South Transdanubia, spring arrives early and we can enjoy the benefits of late summer days, which can last even until early November.

How to get to Pécs:

After landing in Hungary, we advise you to take a shuttle which offers a direct ride to Pécs. This is the safest way to travel, and it costs approx. HUF 20,000 (= EUR 51). There are two main companies that provide airport shuttles from Budapest to Pécs. On their websites, students can book a shuttle before arrival:

- Travel4You Airport Shuttle
- MECSEK Travel Airport Shuttle

Another option for traveling from Budapest to Pécs is the train. The student should ask the taxi or the Airport Minibus driver to take them to the Keleti Pályaudvar (Eastern Railway station in Hungarian). From there, they can travel to Pécs by an Inter-City (IC) train. On the website, you can find the IC timetable. The full fare 2nd class ticket with a seat reservation will cost about HUF 5,000 (approx. EUR 13). The students are advised to take an IC instead of the regular train because ICs are much faster and more comfortable than regular trains.

Quality Education, Global Recognition

Well-known and recognized professors, well-equipped classrooms and dormitories at the University of Pécs enable you to get the best out of your period of study abroad. Whether you are learning a new language or doing scientific research, the University puts the tools you need at your disposal. Our university represents classical values while successfully adapting to the present and using diverse methods of teaching.

LEVEL OF DEGREES AND RECOGNITION

In September 2006, a modern higher educational training system initiated by the European Union was introduced in Hungary too, known as the Bologna process, which offers students an opportunity to pursue their studies in a dynamically developing, flexible European higher educational system. The traditional college and university level training programs were replaced by a three-tier system consisting of a basic training program (BA, BSc), a master level program (MA, MSc), and doctoral level (PhD, DLA) program. The first cycle programs last 6-8 semesters (3-4 years, 180-240 credit points) and lead to a Bachelor's degree. The second cycle programs lead to a Master's degree and last 2-4 semesters (1-2 years, 60-120 credit points). One-tier, undivided, long-term Master's degree programs (5 to 6 years) are offered in some fields of study, e.g. in human medicine, dentistry, pharmacy, veterinary medicine, architecture, law and in a few programs of art education. All Bachelor's and Master's degrees grant access to the labor market. A four-year doctoral program

is a postgraduate alternative that may follow any Master's or equivalent qualification. The university offers shorter programs as well, such as preparatory programs, summer universities and partial trainings. In addition, it attaches great importance to training in the colleges for advanced studies. Nearly every faculty offers training in the framework of this organization that encourages students to pursue their own research.

Due to the European Credit Transfer System (ECTS), which was introduced in September 2003, credits and degrees earned in Hungary are transferable to other European institutions and vice versa. In addition to the diploma, students are also provided with a special supplement that is recognized all over the European Union.

In order to ensure high international standards, strict quality control measures are applied. The Hungarian Accreditation Committee (HAC) conducts continuous institutional and program accreditation procedure and monitors the quality of educational activity for compliance with the European Standards and Guidelines. Hungarian higher education institutions and courses are accredited by HAC.

DOCTORATE COURSE (PHD/DLA) 2+2 years

MASTER'S DEGREE 1-2 years

UNDIVIDED MASTER'S DEGREE PROGRAMMES 5-6 years

BACHELOR'S DEGREE 3-4 years

UNIVERSITY GRADE	EQUIVALENT ECTS GRADE

Student Experience

A sudden change of environment is very exciting but challenging process. To help with this, the University of Pécs has developed services to make newcomers' transitions as smooth as possible.

STUDENT ORGANIZATIONS

The Student Union is the official representative institution of university students. The University Student Union (EHÖK in Hungarian) oversees student affairs at a university level. As an international student, you will meet other student organizations as well, including ESN, AEGEE and AIESEC. Each offer a wide range of learning, travel, recreational and voluntary opportunities for our students. Participating in these organizations can help you to make new friends and encounter new experiences.

For more information on the student organizations of the UP, please visit: international.pte.hu/student-life

DANCING UNIVERSITY

The Dancing University of the University of Pécs is a unique initiative in Hungarian Higher Education. Any student, lecturer or staff member of the University is eligible to participate in a dancing course free of charge.

For more information on the Dancing University of the UP, please visit: tancolo.pte.hu/en

MENTOR PROGRAM

The International Mentor Program project by the University's Student Union (EHÖK) aims to help international students in their integration into the university environment. Mentors (or Buddies) help with practical matters such as opening a bank account, applying for residence permit and finding accommodation. The possibility to have a 'buddy' is given for all the international students.

For more information on the mentor program, please visit: international.pte.hu/current-students/information-about-services/international-mentor-program

SPORTS AND FACILITIES

Sporting life at the University is coordinated by the University Sport Office, which offers a wide range of sporting opportunities to the students and staff. International students can pursue many sports while studying at the University of Pécs such as aerobics, table tennis, handball, basketball, soccer, martial arts, volleyball, archery and fencing. Besides, you are free to use the various sports facilities of the University (e.g. indoor and outdoor swimming pool, gym, sport halls).

For more information on sporting life and facilities, please visit: egyetemisport.pte.hu/en

STUDENT COUNSELLING

Student Counselling is considered an invaluable service within the University of Pécs. Its primary objective is to provide students with professional, discreet and responsive psychological counselling. The service intends to offer counselling to students enrolled in the English language programs and seeks to render professional assistance to students struggling with a plethora of challenges and difficulties evolving from potential changes and upheavals in their personal lifestyles and studies. The service is free of charge and guarantees complete discretion.

You can find out more about this service at www.counselling.pte.hu

CAMPUS LEGAL AID CLINIC

The CLAC (Campus Legal Aid Clinic) was launched in 2015 in order to deepen the academic knowledge of law students, at the same time it provides professional and monitored legal advice for the students of UP. In the past years, a number of foreign students have turned to the law clinic for legal advice. In a personal meeting, they can consult their legal problem with selected law students. Then they get supervised legal advice from a professor of law. This piece of advice and possible solutions are introduced and explained by the

law students to the client. There is a possibility to give legal advice and carry out consultancy in both English and German languages. If you have a question or problem in connection with your lease agreement, equal treatment or other civil wrongs, then do not hesitate to contact us, we do our best to assist you with your legal problem.

You can learn more about the Campus Legal Aid Clinic at <https://ajk.pte.hu/en/campus-legal-aid-clinic/legal-aid>

FOREIGN LANGUAGE CENTRE

The Foreign Language Centre at the University of Pécs has two major activities. It provides various language courses for the student community of the university and for the people of Pécs and it also functions as the international center of the ECL Language Exams. The Foreign Language Centre, in support of the University and the city of Pécs, regularly organizes language courses to teach the necessary skills to effectively communicate in our world. The study courses featuring English, German, French and Japanese include two main types: general language courses and exam preparatory courses. Students of the University of Pécs can take advantage of taking the courses at a reduced price.

The Foreign Language Centre is the international center of the ECL examinations, ECL standing for “European Consortium for the Certificate of Attainment in Modern Languages”. The ECL exams can be taken in English, French, German, Hungarian, Italian, Polish, Rumanian, Bulgarian, Serbian, Slovak, Russian, Spanish, Croatian, Czech and Hebrew. The ECL language exam has been acknowledged as an international qualification, which can be offered for undergraduate admission in the United Kingdom. Students of UP may take this exam at a reduced price.

For more information on the ECL language exam, please visit: www.eclexam.eu

UP grads get into
great graduate schools

Dr. Kenneth Kaunda Kodiyo, PhD

Class of 2024, Faculty of Law

Dean at the School of Law and Sharia, Umma University in Kenya

“My time at the University of Pécs was truly transformative, both academically and personally. Pursuing my PhD there not only deepened my legal scholarship but also broadened my global perspective on law and education. The multicultural environment enriched my understanding of diverse legal systems and philosophies, something that continues to shape how I teach and lead today.”

Oujidane El Arabi

Class of 2020, Faculty of Humanities and Social Sciences

Fund Portfolio Analyst at the Global Fund in Switzerland

“Thanks to my studies, I have gained the necessary tools, knowledge, and know-how to enter the international professional field. Working in diverse environments, as well as developing creativity, teamwork, public speaking, and leadership skills, were some of the key experiences I acquired during my studies, which gave me a great boost in my career. On the other hand, thanks to the University of Pécs, I have also gained lifelong friends with whom I am still in contact.”

Mariam Maqsood

Class of 2022, Faculty of Sciences

Scholarship holder, Doctoral Fellow in Physical Therapy, New York University

“I utilize about 80% of the knowledge I acquired during my years at the UP daily. Even my professors at NYU remarked that I have a strong knowledge base, which is a credit to my previous institutions—and the practice-oriented courses contributed significantly to this.”

International Student Ambassadors

Through our International Student Ambassador Program, we aim to connect you with current students who have already walked the path you're considering. Our ambassadors are here to share their personal experiences, giving you a real sense of what it's like to study and live in Pécs. They'll provide you with honest insights into academic programs, campus life, and the vibrant community that makes our university unique. By hearing their stories, we hope you'll gain a clearer picture of what awaits you at the University of Pécs, helping

you make a more informed and confident decision about your future. Whether you're curious about classes, cultural adjustment, or life in Hungary, our ambassadors are eager to help you navigate this exciting journey.

Fees and Funding

Self-financed international students, registered for a degree program, pay a tuition fee to the University of Pécs.

Please find the tuition fees of the different international programs on the individual program pages or under the following link: <https://international.pte.hu/admission/fees>

To apply for a degree program at the University of Pécs, you will need to pay a non-refundable application fee. Once the university has received your application fee, we can begin processing your application. Some programs require a registration fee as well, which should be paid once in the first semester of the studies. This is also a non-refundable payment.

Before applying to UP, you should carefully read-through the admission requirements for the study program you want to follow. Check the specific requirements for your study program on the website: www.international.pte.hu

STIPENDIUM HUNGARICUM SCHOLARSHIP PROGRAM

The Stipendium Hungaricum Scholarship was founded by the Hungarian Government in 2013, and it is available to students from various countries.

This prestigious scholarship covers the tuition fees and provides contributions toward accommodation, a monthly allowance, and health insurance.

To apply for the Stipendium Hungaricum Scholarship, you need to:

Check the eligibility: ensure that your citizenship is among the eligible countries.

Submit your application: apply through the online application system of Tempus Public Foundation (TPF) between mid-November and January 15th.

Provide the required documents: Prepare necessary documentation, including academic transcripts, proof of language proficiency, a motivational letter, and other relevant materials specified by TPF.

Specific criteria and detailed information about the application process required documents, and deadlines can be found on the official Stipendium Hungaricum website: www.stipendiumhungaricum.hu

LIVING EXPENSES

Please find a list of essentials to get an idea of prices on our website: international.pte.hu/admission/prepare-your-stay/cost-living

AVERAGE YEARLY LIVING COSTS AND TUITION FEES

The costs of a stay in Hungary have generally been considered low by European standards. To be able to pay your rent, buy proper food, and afford an occasional evening out, you need a minimum of HUF 250,000 (≈EUR 600).

Medical studies	EUR
Application, Registration and Tuition fees	9000-16000
Study books and materials	50-150
Accommodation	2250-3660
Insurance	300
Living expenses	4000
Contingencies	500
Total	16100-24610
Non-Medical studies	EUR
Application, Registration and Tuition fees	3400-7800
Study books and materials	50-100
Accommodation	2250-3660
Insurance	300
Living expenses	4000
Contingencies	500
Total	10500-16360

Accommodation

Further to accommodation in Pécs, incoming students have two basic options. They may stay in a dormitory or seek alternative accommodation.

STAYING IN A DORMITORY

The University of Pécs has ten dormitories located in quiet, residential areas of the city. These dormitories are well connected to other parts of the city via bike lanes and public transportation and are conveniently close to university faculties, supermarkets, and a variety of restaurants, including both fast food and regular options. Most dormitories have been recently renovated, featuring well-furnished rooms with private bathrooms. Bedclothes are provided. The rooms are available at an affordable price, ranging from EUR 160 to 210 per month.

Facilities:

-  Internet access per room
-  study room
-  lounge
-  bike storage
-  parking slots
-  cafeteria
-  24/7 reception service

RENTED ACCOMMODATION

For incoming students who require superior quality accommodation, rented flats are an alternative. Renting a flat can offer students the peace, comfort, and privacy they need. In Pécs, numerous private companies provide free apartment-finding services specifically for students, offering a wide range of options. While apartments are available starting from 75,000 HUF per month (approximately EUR 192), this rate typically applies when students share a flat.

HOW DO I START LOOKING FOR A PLACE TO RENT?

The monthly rental price of a two-room apartment might cost between HUF 120.000 to 200.000 (EUR 300-515). The surroundings, the distance from the University and the facilities might affect this price. Please note that utility bills and property management fee are not included in the rental fee. Always take into consideration that you might need to sign up for an Internet connection at a local communication service provider and bear its expenses. Paying a deposit, which usually equals to 1 or 2 monthly fees, is always required by the accommodation provider. This shall be paid in advance before moving in, and it is released after moving out from the apartment. Please note that you might need to use public transportation to reach your destination comfortably.

For more information on housing, please visit our website: international.pte.hu/admission/prepare-your-stay/housing

Visa, Work, and Health: What You Need to Know

VISA & RESIDENCE PERMIT

EU/EEA and Swiss citizens can stay up to 90 days with a valid ID and must register within 90 days if staying longer for studies. Non-EEA nationals need a visa to enter Hungary and stay more than 90 days. The visa application, submitted to the Hungarian Consulate, requires a completed form, valid passport, photo, university acceptance letter, proof of accommodation, financial support, and travel insurance.

Check out the website for detailed information: <https://international.pte.hu/admission/prepare-your-stay/immigration-affairs>

HEALTH INSURANCE

First aid and emergency care are free for foreigners in Hungary, but other treatments require payment. EU citizens can use the European Health Insurance Card for essential care but not for deferred services. International students are advised to have private medical insurance. The University of Pécs suggests the Generali STUDIUM insurance for about 120,000 HUF annually. Non-EU students without insurance must pay for care. Students with a Hungarian Social Security Card (TAJ) are eligible for full healthcare services.

Check out the website for detailed information: <https://international.pte.hu/admission/prepare-your-stay/health-insurance>

WORK OPPORTUNITIES

During your studies

In Pécs, Hungarian and international students can also find part-time work through student work services.

EEA Students (EU, Norway, Switzerland, Iceland, Lichtenstein): No work hour limitations; a registration card is required.

Non-EEA Students: You can work up to 30 hours per week during studies and up to 90 days outside the study period with a residence permit. Earnings range from 200-300 EUR per month.

Detailed information is available here: studyinhungary.hu/living-in-hungary/menu/formalities/work-in-hungary.html

After your studies

You can stay in Hungary after graduation with the “study-to-work” residence permit. This permit allows you to stay in Hungary for 9 months after graduation to find a job or start a business. You must apply at least 15 days before your student residence permit expires. Ensure you have funds, health insurance, and accommodation. Once employed or your business is running, you can convert this permit into a full residence permit.

Detailed information is available here: <https://international.pte.hu/study-work-residence-permit>

“In a relatively short time frame, studying in Pécs has stimulated my academic and individual growth at a rate I never expected. This has all happened alongside living abroad in a safe environment and meeting others from many different cultures and walks of life. It has been a one of a kind experience I am fortunate to have under my belt.”

**Maryam Cowan, United States of America,
Medical School, General Medicine**

Faculty of Pharmacy			
Pharmacology and Pharmaceutical Sciences PhD	8 semesters	6000 USD	Fall
Faculty of Law			
International and European Law MA (online)	3 semesters	1500 EUR	Fall
Law PhD	8 semesters	2500 EUR	Fall

*OTM: An undivided one-tier program results in a Master's degree lasts 10-12 semesters and requires the completion of 300-360 credits.

Admission to International Programs

ELIGIBILITY

Preparatory courses	In order to be offered a place in a preparatory course, you must have successfully completed your upper secondary (high school) education or have been awarded a college degree.
Advanced Vocational Training	In order to be offered a place in advanced vocational training, you must have successfully completed your upper secondary (high school) education or have been awarded a college degree and be able to demonstrate at least upper-intermediate proficiency in the language of instruction.
Bachelor Programs	In order to be offered a place in a bachelor's (first cycle or undergraduate) program, you must have successfully completed your upper secondary (high school) education and be able to demonstrate at least upper-intermediate proficiency in the language of instruction.
One-tier Master (OTM) Programs	In order to be offered a place in a one-tier master program, you must have successfully completed your upper secondary (high school) education and be able to demonstrate at least upper-intermediate proficiency in the language of instruction.
Bachelor of Education (BEd) Training	In order to be offered a place in BEd training, you must have been awarded a Bachelor's degree in Teaching by an internationally recognized university and be able to demonstrate at least upper-intermediate proficiency in the language of instruction.
Master Programs	In order to be offered a place in a master's (second cycle or graduate) program, you must have been awarded a Bachelor's degree by an internationally recognized university and be able to demonstrate at least upper-intermediate proficiency in the language of instruction.
PhD Programs	In order to be offered a place in a PhD program, you must have been awarded a Master's degree by an internationally recognized university and be able to demonstrate at least upper-intermediate proficiency in the language of instruction.

General entry requirements

In order to be eligible for university studies in Hungary, a student must demonstrate that they meet several requirements for the course or program. There are certain general entry requirements that all students must meet and documents that applicants must submit:

	Preparatory courses	Advanced Vocational Training	Bachelor Programs	Master Programs	One-tier Master programs (OTM)	BEd trainings	PhD Programs
Certificate of the previous studies	Secondary school leaving certificate	Secondary school leaving certificate or BA/BSc degree	Secondary school leaving certificate	BA/BSc degree	Secondary school leaving certificate	BA/BSc degree	MA/MSc degree
Transcript of previous studies	✓	✓	✓	✓	✓	✓	✓
At least upper-intermediate proficiency in the language of instruction	—	✓	✓	✓	✓	✓	✓
CV in the language of instruction	✓	✓	✓	✓	✓	✓	✓
Motivation letter in the language of instruction	—	✓	✓	✓	✓	✓	✓
Admission examination	Placement test and an online interview	Admission examination interview	Admission examination interview	Admission examination interview	Admission examination interview	Admission examination interview	Admission examination interview

There can be specific entry requirements for certain programs. For example, an engineering course may require a higher level of previous math studies. Information on the specific entry requirements can be found on the study program's page on the University's website: www.international.pte.hu.

Read more about the requirements ↴

How to apply

To start the process, just visit the www.apply.pte.hu website and follow the steps below.

1

Submit the application

Once you have chosen the best program for you, click on "Apply now" and submit your application.

10-15 days

2

Application fee payment

After the successful submission, you will receive a notification for application fee payment immediately. You can click on the button "Pay online", and submit the fee right away. Or you can choose to transfer it via regular bank transfer.

3

Evaluation of the application

Once we have received the payment, the Faculty starts the evaluation of the documents.

4

Online interview

If you are eligible, the Faculty will send an invitation to an online interview.

7-10 days

5

Interview result

You will receive the result of your interview within 7-10 days.

6

Tuition fee payment

If you succeed on the entrance exam/online interview, you receive an offer, together with a Conditional Acceptance Letter and a notification for tuition fee payment. You will have a deadline for the payment, and with the online payment option, the invoice will be collected immediately. If you wish to use bank transfer, please note, that earlier you transfer the fee, the earlier will we receive the amount, and can continue with the admission procedure.

10-15 days

7

Notification

You receive a notification about your successful tuition fee payment.

2-3 days

8

Letter of acceptance

Upon receiving the tuition fee, the Faculty will issue the Final Acceptance Letter.

9

Visa appointment

With the Final Acceptance Letter, now you can start the VISA application procedure. Start your VISA application as soon as possible, because sometimes this procedure can take very long.

+

1

Congratulations

You can now start arranging your travel to Pécs!

If you need a little help regarding what and how to prepare for your stay, visit this page: https://international.pte.hu/prepare_your_stay

Bachelor Programs

Business Administration and Management BSc

Degree:

Bachelor of Sciences (BSc) in Business Administration and Management

Duration of training:

6+1 semesters

Language of instruction:

English

Deadline for application:

31 May

Starting date:

September

Tuition fee:

EUR 2750 per semester for non-EU citizens and EUR 1,150 for EU citizens

Application fee:

EUR 150

DESCRIPTION OF THE PROGRAM:

The Business Administration bachelor program is accredited by EFMD Global, a leading international organization of business schools. This provides unique recognition to all graduates. Your EFMD accredited bachelor degree is recognized all over the World and can open doors to you to the biggest companies worldwide.

The program is conducted in an innovative way, including not only lectures but also case studies, practical tasks and teamwork as well. The program has a sizeable number of guest lecturers from Europe and the United States. By carefully selecting the optional modules students may acquire a better overall knowledge of a chosen field such as marketing, management or finance. The aim of the program is not simply to teach economics, but, more importantly, to prepare students for the 21st-century challenges of the business world and the global market.

In accordance with the agreement made between our School and ESDES School of Management (Lyon) and KEDGE Business School (Bordeaux), students studying at the University of Pécs can also acquire a BSc degree from the partner universities, in addition to their Hungarian certificate.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
– Quantitative methods – Microeconomics – Information Systems
2 nd semester
– Probability and Statistics – Macroeconomics – Introduction to Management
3 rd semester
– Organizational Behaviour – Introduction to Accounting – Introduction to Marketing
4 th semester
– Corporate Finance – Human Resource Management – International Economics
5 th semester
– International Business Communication – International Business – Business Case Studies
6 th semester
– Banking and Finance – Operations Management
7 th semester
– Internship

“Grateful to have been given the opportunity to study in Hungary, especially in the University of Pécs, I can not say thank you enough. I learned a lot, travelled a lot, met a lot of new people and had a lot of fun. It is the program, the professors here in Pécs that promote the self-confidence, independent thinking and push each student to be the best of themselves. University of Pécs is great in every possible ways. I know my study here would be one of the most fantastic experience in my whole life.”

Trang Pham Huong, Business Administration and Management BSc, Vietnam

Dietetics BSc

DESCRIPTION OF THE PROGRAM:

Obese people have to fight several diseases that are connected with their weight (cardiovascular diseases, diabetes, and cancer). If you have the drive to help them, dietetics will provide you the required knowledge. Healthy eating – and thus the knowledge of a dietitian – is essential to prevent and successfully treat several diseases, as medications or a surgery rarely provides a complete solution. Patients are often forced to drastically change their eating habits which can negatively impact on them, and a dietitian may greatly contribute to the patients' treatment, balance and well-being by offering enjoyable but healthy dietary options.

After acquiring the basics of health, life and social sciences students will take part in cooking practices. They will learn the composition of foods from A to Z, so they will understand even the fine print components on the packages of products. After learning the typical diets of certain illnesses students will use this knowledge in practice by working with doctors and their mentors in clinical environment.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

- Clinical Dietetics for Internal Medicine
- Dietetics of Infancy and Childhood Diseases
- Nutrition Management
- Technical Knowledge Relating to Catering Institutions
- Food Product Chemistry and Biochemistry
- Food Knowledge and –Technology
- Food Preparation Technology and Colloidics
- Practical Dietetics
- Economics of Housekeeping
- Public Nutrition
- Finances
- Surgical Clinical Dietetics
- Specialized Clinical Dietetics
- Nutritional Psychology
- Nutritional Science, Politics and Epidemiology

Degree:

Bachelor of Science in Dietetics

Duration of training:

8 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 2,900 per semester

Application fee:

EUR 200

Registration fee:

EUR 100

“Leaving my home country, my comfort zone and my family was definitely challenging, but from being an international student friendly environment to a great knowledge provider, University of Pécs absolutely did not disappoint to make the challenge an amazing experience I will carry for the rest of my life.”

Nosiba Konyali, Dietetics BSc, Libya

Nursing BSc

Degree:

Bachelor of Science in
Nursing and Patient Care –
Nursing Major

Duration of training:
8 semesters

Language of instruction:
English

Deadline for application:
30 June

Starting date:
September

Tuition fee:
EUR 2,900 per semester

Application fee:
EUR 200

Registration fee:
EUR 100

DESCRIPTION OF THE PROGRAM:

The aim of the program is to train nursing and health care professionals who are able to take part with full responsibility in prevention, treatment, nursing and rehabilitation at all levels of health and social care. Students will acquire knowledge of individual, family, community and public health protection and rehabilitation as well as of health and social services. This profession requires grave responsibility and deep knowledge of health and natural-medical sciences from the professionals. During the training students get to know the body's normal anatomical and pathological functions, the causes and symptoms of illnesses and the possible treatments and preventions. On the demonstrational exercises the students will be able to practice the medical procedures on lifelike instruments (e.g. blood sampling, infusion therapy, patient examination, punctuation).

This Bachelor program has its own Master's program of 2 years which will entitle the students to settle in one of the following Advanced Practice Registered Nurse (APRN) specializations: intensive care, emergency care, primary care, gerontological care

EXAMPLES OF SUBJECTS DURING THE STUDIES:

- Basic Health Care
- Anesthesiology
- Internal Medicine
- Pediatrics
- Geriatrics
- Intensive Therapy
- Neurology
- Psychiatry
- Surgery
- Obstetrics
- Community Nursing
- Nursing of Chronic Diseases

“There is provision for internship/training at some German and Austrian hospitals. Students get to gain hands-on clinical experience at different units in the hospital which improves their clinical thinking and their ability to make sound clinical judgements related to patient care.”

Samuel Akinola, Nursing BSc, Nigeria

E-mail: intoffice@etk.pte.hu

Physiotherapy BSc

DESCRIPTION OF THE PROGRAM:

The physiotherapist is much more than a masseur or aerobics instructor. The massaging and exercising is only a small element of the wide variety of techniques with which a physiotherapist creates magic: the joy of painless movement. You use your body day by day but have you ever wondered how much work your muscles, sinews and joints do in order to move your body parts in harmony? If you dislocate your ankle or pinch a nerve in your back, you will understand how important it is to take good care of your body. With the 20-21st century came a change in our lifestyle. Did you grow up playing football, climbing trees all day long? These stimuli are important in the early development of our movement and nervous system. As a physiotherapist, you can cure the problems created by inactivity.

Although our world is moving fast, we don't move enough. And so, a physiotherapist will always have many tasks. With your creativity and empathy, you could be the creator of a new treatment, the new Dévény, McKenzie or Schrott! You don't necessarily have to work in health care; you'll have opportunities to work for wellness, fitness or sport centers, spas and spa-hotels or even sports clubs. If you have the experience

you can also start your own business. You can always deepen your knowledge by doing research or teaching: you can gain a PhD in the Doctoral School. Or you can open a private physiotherapy praxis. The health, life and social sciences will be followed by a great deal of anatomy. After mastering these, you will deepen your knowledge in the workings of the muscles and joints. You will get the knack of the job after participating in skill labs and if your moves are skilled enough you will then use this knowledge in the field with the help of a mentor. This Bachelor program also has its own Master's program of 1.5 years.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

- Basics of Physiotherapy
- Manual Techniques
- Cardio-Respiratory Physiotherapy
- Locomotor Diseases
- Neurological-Psychiatric Physiotherapy
- Infant-Pediatric and Obstetric-Gynecological Physiotherapy
- Rehabilitation
- Electro-Diagnostics
- Radiology and Imaging Procedures

Degree:

Bachelor of Science in Nursing and Patient Care - Physiotherapy Major

Duration of training:

8 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 2,900 per semester

Application fee:

EUR 200

Registration fee:

EUR 100

"The University of Pécs has welcomed me and has been really good to me since it has allowed me to express myself intellectually as well as interpersonally. Overall, I've received a lot of help as I hone my skills and enhance my understanding for my speciality, as well as counteract the isolation that comes with living in a foreign country by engaging in cultural activities here in the city."

Omar Ben Selama, Physiotherapy BSc, Morocco

For more information, please contact:

International Office

Tel: +36 72 501 500 /38471 or 38472

E-mail: intoffice@etk.pte.hu

Biology BSc

Degree:

Bachelor of Science in
Biology

Duration of training:

6 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 5,000 per year

Application fee:

EUR 140

DESCRIPTION OF THE PROGRAM:

The study program offers complete education in biology with core subjects covering neurobiology, genetics, microbiology, animal and plant ecology, botany, zoology, and plant physiology. Fields of specialization in the second year include two modules: infra individual (meaning more laboratory practice and cellular biology) and supra-individual (meaning more ecology) courses. Each module comprises 5-8 subjects taught through lectures, seminars and laboratory sessions. The foundation subjects are presented through lectures, seminars and laboratory sessions. The program provides a wider view of the related scientific fields (chemistry and physics). Students will familiarize themselves with the most modern instrumentation in our new research center. The program covers all aspects of education, research and innovation in the fields of biomedical, natural and environmental sciences. It also provides opportunity to join the research work in 22 different research groups.

EXAMPLES OF SUBJECTS DURING THE STUDIES:
1st semester

- Biological Laboratory Fundamentals
- Plant Anatomy and Morphology
- Cell Biology

2nd semester

- Organic Chemistry
- Zoo taxonomy
- Plant Taxonomy and Systematics

3rd semester

- Biochemistry
- Comparative Physiology
- General Ecology

4th semester

- Biochemistry laboratory
- Plant Physiology
- Microbiology

5th semester

- Biogeography
- Basic Genetics
- Molecular Biology

6th semester

- Nature Conservation and Environmental Protection
- Evolution
- Ethology

“My time at the University has taught me patience and the importance of living in the moment. Balancing my biology major with other courses, ESN events, gym sessions, and planning activities has shown me how to organize my time effectively while embracing spontaneity. These past three years have shaped me, opening doors to incredible opportunities and unforgettable memories. The experiences and connections I’ve made have enriched my journey, and I’m beyond grateful to have lived and grown through it all.”

Tasneem Rabata, Biology BSc, Jordan

Chemistry BSc

DESCRIPTION OF THE PROGRAM:

The study program offers complete education in chemistry, with core subjects covering inorganic and organic chemistry, analytical and environmental chemistry, and physical chemistry. Specialized courses include instrumental analysis, advanced organic chemistry and physical chemistry measurements. Foundation courses aimed at providing through knowledge in mathematics, chemometrics, basic theoretical chemistry and biochemistry complete the curriculum. The subjects are presented in the form of lectures (theoretical background to the topics, with the aim to provide a wider view of chemical application), seminars (providing space for the discussion of the topics and practicing chemical calculation), and laboratory session. The students will deepen their knowledge with the help of the most modern instrumentation.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
<ul style="list-style-type: none"> - Fundamentals of Chemistry - Informatics - General and Inorganic Chemistry
2 nd semester
<ul style="list-style-type: none"> - Physics - Mathematics - Physical Chemistry
3 rd semester
<ul style="list-style-type: none"> - Analytical Chemistry - Organic Chemistry - Chemometrics
4 th semester
<ul style="list-style-type: none"> - Petrology - Materials Sciences - Chemical Sensors
5 th semester
<ul style="list-style-type: none"> - Applied Chemistry - Probability Theory - Mineralogy
6 th semester
<ul style="list-style-type: none"> - Environmental Chemistry - Colloid Chemistry

Degree:

Bachelor of Science in Chemistry

Duration of training:

6 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 5,000 per year

Application fee:

EUR 140

“Throughout the 3 years, I have been here I have gone through ups and downs, I have learned a lot of things and made a lot of memories that I will carry with me my whole life. Every year I see new faces from new countries and I feel the international vibe of it, which makes me proud.

My experiences at the University of Pécs were by far the best in my life, I am very proud and thankful. The university of pécs is what I can by now call HOME.”

Laila Idouissaden, Chemistry BSc, Morocco

For more information, please contact:

International Office

Phone: +36 72 503-600/24283 | E-mail: contact@gamma.ttk.pte.hu

Computer Science BSc

Degree:

Bachelor of Science in
Computer Science

Duration of training:

6 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 5,000 per year

Application fee:

EUR 140

DESCRIPTION OF THE PROGRAM:

The Computer Science BSc program offers full 3-year-education in computer science and programming. The aim of the course is to train students who will be able to work in the IT sector as coders or software developers, or continue their studies at a master (MSc) level. Core subjects include Discrete Mathematics, Calculus, Linear Algebra, Numerical Analysis, Probability and Statistics, Mathematical Logics, System Design, Programming Methodology, Programming Languages, Software Technology, Computer Architecture, Operating System, Networking, Theory of Databases, etc. Having collected 90 credits from the core subjects, the student has a choice between an academic and an applied specialization. The academic specialization is more focused on applied and fundamental mathematical issues such as operations research, advanced theory of algorithms, etc., while the applied one is concerned with actual software development technologies. Both specializations offer flexibility in the choice of courses according to the students' interest.

EXAMPLES OF SUBJECTS DURING THE STUDIES:
1st semester

- Discrete Mathematics
- Calculus
- Linear Algebra

2nd semester

- Methodology of Programming
- Algorithms and Data Structures
- Computer networks

3rd semester

- Introduction to Computer Science
- Probability and statistics
- Relational databases

4th semester

- Operation of IT systems
- Software development technologies
- Introduction to AI

5th semester

- Distributed Systems and Parallel Programmin
- Compilers and assemblers

6th semester

- Operating Systems
- IT Security
- Computer game development

"University of Pécs opened my world. It taught me independence, exposed me to diverse cultures, and shaped my passion for data and tech. My ISA experience built lasting friendships and sparked the confidence I carry into my career today."

Zeid Dissi, Computer Science BSc, Jordan

Website: <http://www.ttk.pte.hu/en>

Geography BSc

DESCRIPTION OF THE PROGRAM:

The study program offers complete education in geography, with optional specializations in Landscape and Environmental Studies, Regional and Settlement Development and Tourism. All three specializations are supported by a strong GIS basis. The program provides general bachelor level education in geography. It includes foundation modules providing an introduction to natural and social sciences, geology and geography. The core program is based on fundamental issues, including topics in Physical, Human and Regional geography. Advanced courses can be chosen from the subjects offered for the given specialization. Besides the compulsory courses, students also have to choose from elective courses to help them in their specialization. The courses usually consist of two parts: a lecture and a problem-solving seminar, each worth 1 to 4 credits, depending on the nature of the topic.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st semester

- Introduction to Human Geography
- Introduction to Geoinformatics (GIS)
- Introduction to Astronomy

2nd semester

- Meteorology and Climatology
- Geomorphology
- Population and Settlement Geography

3rd semester

- Pedology and Hydro-geography
- Biogeography
- Urban and Economic Geography

4th semester

- Physical Geography of the Carpathian Basin
- Hydrogeography
- Human Geography of Hungary

5th semester

- Physical and Human Geography of Europe
- Urban Development and Planning
- Regional Policies

6th semester

- Introduction to Remote Sensing
- Landscape Analysis and Planning
- Spatial and Social Conflicts
- Digital Cartography

Degree:

Bachelor of Science in Geography

Duration of training:

6 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 5,000 per year

Application fee:

EUR 140

“Being a student at the University of Pécs, has served as an eye opener. I have met and made new people and friends. laughing out loud my first snow experience was in Pécs. I have learnt and shared my cultural values and others through our languages, food, clothes and dance moves. My professors I would say are the best. They lecture with understandings produce what I understand and corrections are made where necessary. The staff and other students are also polite and helpful.”

Pamela Owusu Nkwantabisah, Geography BSc, Ghana

Mathematics BSc

This program will not start in the 2026/27 academic year.

Degree:

Bachelor of Science in Mathematics

Duration of training:
6 semesters

Language of instruction:
English

Deadline for application:
30 June

Starting date:
September

Tuition fee:
EUR 5,000 per year

Application fee:
EUR 140

DESCRIPTION OF THE PROGRAM:

The Mathematics BSc program offers full 3-year-education in mathematics. The course provides general bachelor level education in mathematics, which can serve as a basis for further studies in mathematics or computer science. The basic courses include Logics, Computer Science, Linear Algebra, Number Theory, Calculus, Geometry, Probability Theory, Statistics, and Game Theory. The advanced courses include Mathematical Programming and Operations Research, Group Theory, Computer Algebra, Numerical Methods, and Applied Computer Science. The courses usually comprise two parts: a lecture and a problem-solving seminar, each worth 2 or 3 credits, depending on the nature of the course.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

- Linear Algebra
- Introduction to Algebra and Number Theory
- Theory
- Introduction to Analysis
- Introduction to Geometry
- Algebra and Number Theory
- Analysis
- Geometry
- Combinatorics
- Foundations of Mathematics
- Probability Theory and Mathematical Statistics
- Programming
- Elementary Mathematics
- History of Mathematics
- Electives:
- Game Theory
- English Mathematical Terminology
- Counting Problems
- Graphic Topology
- Lectures from the Theory of Infinite Series

“Being a student of this university is a pleasure and a big opportunity to show the best of me with such a great academic staff that are always helpful and it is interesting enough to see how different nationalities talk about science and get to know even more about them. Studying in Hungary is giving me unforgettable moments with wonderful people around.”

Dafina Toplanaj, Mathematics BSc, Kosovo

Physics BSc

DESCRIPTION OF THE PROGRAM:

The Physics BSc program offers full 3-year education in physics. The study program provides complete education in physics, with the possibility of specialization in IT in Physics and Applied Physics (with a strong emphasis on laser physics). The curriculum is organized into modules covering introductory courses to natural sciences and common core courses for all physics students (basic courses in mathematics, physics and informatics). The courses related to the specialization in Applied Physics cover advanced topics in experimental and theoretical physics as well as the necessary courses in mathematics and informatics. The focus of the specialization in Informatics in Physics is data acquisition, signal processing in LabVIEW, database management and programming in C# language. The students will familiarize themselves with the most modern instrumentation.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
<ul style="list-style-type: none"> - Computer Technology - Linear Algebra - Introductory Mechanics Lecture
2 nd semester
<ul style="list-style-type: none"> - Calculus - Thermodynamics - Waves and Optics
3 rd semester
<ul style="list-style-type: none"> - Electricity and Magnetism - Modern Physics - Metrology
4 th semester
<ul style="list-style-type: none"> - Electrodynamics - Mathematical Methods in Physics - Numerical Methods
5 th semester
<ul style="list-style-type: none"> - Electronics - Quantum Mechanics
6 th semester
<ul style="list-style-type: none"> - Terahertz Spectroscopy - Statistical Physics - Modern Optics

Degree:

Bachelor of Science in Physics

Duration of training:

6 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 5,000 per year

Application fee:

EUR 140

“Pécs is an amazing town with breath-taking hiking spots and adventures that connects your soul to nature. I applied to the University of Pécs, as it is known for its research in Quantum optics, facilities, ranking and excellent team of researchers and professors. The kind of support provided by the entire team of university staff boosts my enthusiasm towards learning more. I adore my university’s Botanical garden, walking there with friends after classes is so peaceful and amazing. Therefore, it ensures me that I made the right decision choosing UP.”

Muskan Kingrani, Physics BSc, India,

Earth Sciences BSc

Degree:

Bachelor of Science in
Earth Sciences

Duration of training:
6 semesters

Language of instruction:
English

Deadline for application:
30 June

Starting date:
September

Tuition fee:
EUR 5,000 per year

Application fee:
EUR 140

DESCRIPTION OF THE PROGRAM:

The Earth Sciences BSc program offers full 3-year-education in earth sciences. The program provides general bachelor level education in earth sciences and offers the possibility to specialize in Geology. It includes introductory modules to Nature Sciences, Geology and Geography. The core of the program is based on the fundamental issues of earth sciences and includes topics in Astronomy, Cartography, Geomorphology, Geophysics, Geochemistry, Hydrology, Meteorology, Paleontology, Paleoclimatology, Remote Sensing, Stratigraphy, etc. while a strong regional geographical aspect is also present. The program also includes a variety of human geographical courses.

EXAMPLES OF SUBJECTS DURING THE STUDIES:
1st semester

- Chemistry, Physics, Biology, Maths basics
- Meteorology
- Introduction to Astronomy

2nd semester

- Climatology
- Geomorphology
- Historical Geology and Paleontology

3rd semester

- Paleontology
- Introduction to Geophysics
- Systematic Mineralogy

4th semester

- Stratigraphy
- Petrographic Microscopy
- Igneous and Metamorphic Petrology

5th semester

- Sedimentary Petrology
- Geology of Energy Resources
- Geochemistry

6th semester

- Economic Geology
- Engineering Geology
- Professional Practice and Thesis

“Here it’s where you can rediscover yourself! My experience has been amazing so far as an international student at UP. I found the fruitful interaction between the professors and students I was seeking for and the professors are tolerant, flexible and understanding. The international atmosphere is gorgeous where you can deal with a lot of students from all over the globe. Pécs is a calm city with such a beautiful nature and weather. I believe that it’s an experience that will lead me to great achievements in the near future.”

Ahmed Hamido, Earth Sciences BSc, Egypt

Physical Training BSc

DESCRIPTION OF THE PROGRAM:

The general aim of the program is to train students to become coaches. Trainers who gain a well-established theoretical and practical knowledge and skills to be able to plan and implement training sessions for junior players, youth and adult athletes, too. Coaches who become responsible to select athletes, improve and guide their personality and to enhance their performance. The curriculum is organized in five modules: team and individual sports, medical aspects of sport, social aspects of sport, sport sciences, and professional practice. Each module has approximately 5-10 subjects. Students participate in internships every semester. During the first three semesters as a visitor then later, they are asked to conduct and lead workouts alongside with the teachers. The subjects are presented in lectures, seminars, practices, and laboratory work, too.

You must choose one sport specialization at the time of the application, one out of these:

- Athletics
- Handball
- Basketball
- Football
- Swimming.
- Fencing (will only start in case of a sufficient number of applicants)
- Pentathlon (will only start in case of a sufficient number of applicants).

All other sport is considered individually.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
<ul style="list-style-type: none"> - Anatomy I - Biochemistry - Accident prevention, first aid and sport hygiene
2 nd semester
<ul style="list-style-type: none"> - Social Sciences - Developmental Psychology - Callistenics
3 rd semester
<ul style="list-style-type: none"> - Biomechanics - Physiology, Sport physiology - Basics of individual sports
4 th semester
<ul style="list-style-type: none"> - Dietetics - Dopping and Sports - Physical Education games
5 th semester
<ul style="list-style-type: none"> - Exercise physiology - Performance testing - Recreation Theory
6 th semester
<ul style="list-style-type: none"> - Prevention, Physical Therapy and Rehab - Sport injuries - Leadership and organization of sport camps

International Relations BA

Degree:

Bachelor of Arts in International Relations

Duration of training:

6 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 2,350 per semester (for non-EU students);
EUR 1,800 per semester (for EU students)

Application fee:

EUR 140

DESCRIPTION OF THE PROGRAM:

The International Relations BA degree is an interdisciplinary course addressing key global challenges, issues and approaches to politics. The goal of the program is to train highly qualified experts with broad education in the social sciences. We have a wide range of courses focusing on the global issues, dealing with the developing countries and the growing Asian states, while we can offer a deep insight into the European and Central Eastern European issues.

The three-year undergraduate course will provide you with the theoretical and practical context of international relations offering an intellectual preparation for a wide range of career choices.

WHY CHOOSE US AND THE UNIVERSITY OF PÉCS?

- Your learning will be supported by a professional staff including specialists on key regions of the world.
- This Program draws cross-Faculty expertise from Faculty of Humanities and Social Sciences, Business and Economics and Law.
- Located in Pécs, in a truly international small city, within the European Union, in the center of Central Eastern Europe.
- Employability in numerous fields including the NGO sector, International Organisations, diplomacy, political analysis, journalism, Ministries and much more.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
<ul style="list-style-type: none"> - World History in the 20th Century I-II - Political Geography - Introduction to International Relations
2 nd semester
<ul style="list-style-type: none"> - Introduction to Social Communication - International Negotiation Techniques - The History of International Relations I-II.
3 rd semester
<ul style="list-style-type: none"> - Fundamentals of Political Law - Comparative Politics I-II. - International Law I-II.
4 th semester
<ul style="list-style-type: none"> - International Economics - Introduction to Diplomacy - International Civil Society
5 th semester
<ul style="list-style-type: none"> - Regionalism and Governance - The Issue of European Integration and Nations - International Studies in Practice
6 th semester
<ul style="list-style-type: none"> - Social Philosophy - Introduction to Migration Policy - Introduction to Security Policy

“Studying at the heart of Europe was a chance to travel and discover different surrounding countries and to participate in exchange programs. Honestly, studying in Pécs was the best decision I’ve ever made, I discovered myself, improved my skills and gained personal and professional growth.”

Ghada Bouajaja, International Relations BA, Tunisia

Psychology BA

DESCRIPTION OF THE PROGRAM:

Psychology as the study of behavior has close links with the biological and social sciences as well as with the humanities such as philosophy and literature. The general aim of our program is to contribute to the intellectual and personal development of each student. Some students will choose to pursue more advanced studies in specialized areas, whereas others will choose to develop their studies within a broader educational experience before moving into a career in a wide range of employment sectors. The program endeavors to enable students to develop their capacity to contribute both to their own development and to that of the society in their future career. Recent years have seen a massive growth of interest in behavioral issues in everyday life, ranging from stress, health, human-machine interaction and artificial intelligence, to social dynamics, personal development, mental illness, management techniques and the environment, to name but a few. Our students develop skills in experimental science, communicating with others, statistical analysis, and research, ensuring that our psychology graduates are well equipped to pursue a range of careers.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st semester

- Introduction to Psychology
- Social Psychology: Culture and Socialization
- Basic Biological Knowledge

2nd semester

- Evolutionary Psychology I.
- The Cognitive Psychology of Attention
- Human Genetics

3rd semester

- The Cognitive Psychology of Memory
- Analytical Developmental Psychology
- Neurology

4th semester

- The Cognitive Psychology of Thinking
- Social Psychology of Communication
- Psychometric

5th semester

- Behavioral Views of Personality
- Measures at Organizations
- Applied Fields of Psychology

6th semester

- Health Psychology
- Introduction to Work and Organization Psychology
- Introduction to Psychology at Schools

Degree:

Bachelor of Arts in Psychology

Duration of training:

6 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 3,900 per semester (for non-EU students);
EUR 2,900 per semester (for EU students)

Application fee:

EUR 140

“University of Pécs has not only given me multiple opportunities as a student but also enhanced my further abilities like public speaking, handling international students via ISA program, taught me how to mentor via SHMN program. I’m honestly really thankful for all the teachers and international office who believe and saw in me what I didn’t. It’s no doubt my second home.”

Fatima Majid Malik, Psychology BA, Pakistan

Social Work BA

Degree:

Bachelor of Arts in Social Work

Duration of training:
7 semesters

Language of instruction:
English

Deadline for application:
30 June/30 November

Starting date:
September/February

Tuition fee:

EUR 2,200 per semester
(for non-EU students); EUR
1,700 per semester (for EU
students)

Application fee:
EUR 140

DESCRIPTION OF THE PROGRAM:

Our study programs provide students with critical-reflective thinking skills necessary to understand the socio-cultural context of their work. Bachelor of Social Work graduates are aware of the complexity and dynamics of social systems and human behavior. They are committed to values and ethics of Social Work and act according to the principles of social justice. Social workers promote the development of democratic social relations and social integration. Major modules of the program: Theory and Practice of Social Work, Social Policy, Sociology, Economics, Social Law and Administration, Psychology, Public Health, and Education. Students are required to spend the 7th semester on placement, depending on their personal interests and institutional possibilities.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st semester

- Welfare and Social Economy
- Introduction to Societal and Social Policy
- Reflective Communication Skills Training

2nd semester

- Social Context of Human Development
- Special Policy Issues of Life-span Development
- Contemporary Drug Policy

3rd semester

- Strength-based Social Work with Individuals
- Societal Processes and Social Problem
- The Psychology of Life-Span Development

4th semester

- Family consultation
- The Application of Law in Social Work
- Public Health and Epidemiology

5th semester

- Addiction Studies - Drugs and Society
- Foundations of Child Protection
- Social Justice and Professional Ethics

6th semester

- Specific Fields and Methods of Social Work
- Social Work with Persons with Substance Use Disorder
- Introduction to Counselling

7th semester

- Intensive Field Practice

“My experience at the University of Pécs thus far has been one I will remember for the rest of my life. I’ve made friends with international students from all corners of the globe and am constantly interested in the topics discussed in my lectures.”

Mesa Rose Matthews, Social Work BA, USA

English and American Studies BA

DESCRIPTION OF THE PROGRAM:

Our goal is to develop professionals with a high level of theoretical and practical knowledge in the field of English Studies and related areas of the Social Sciences. By obtaining their BA, students will possess a wide range of skills and knowledge:

- a thorough understanding of the English language and of English-speaking people and cultures worldwide,
- a high level of competence in the English language meeting the competency requirements of both the written and oral parts of the CEFR level C1
- familiarity with basic research and study techniques within the field of English Studies,
- the ability to translate a variety of non-field specific texts in an intelligent manner,
- strengthen cultural ties through a creative application of their language and problem-solving skills,
- contribute to local cultural and civic life, especially in the area of Anglophone cultural connections,
- play active roles in mass communication, media and tourism.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
<ul style="list-style-type: none"> - The History of Philosophy - Language Development - The Language of English Literary and Cultural Studies
2 nd semester
<ul style="list-style-type: none"> - The Language of English Linguistics - History of the United Kingdom
3 rd semester
<ul style="list-style-type: none"> - Introduction to Applied Linguistics - History of the United States
4 th semester
<ul style="list-style-type: none"> - American Literature and Culture - United States Society and Culture
5 th semester
<ul style="list-style-type: none"> - Contemporary British Society and Culture - Modern British and Irish Literature - Introduction to Irish Culture
6 th semester
<ul style="list-style-type: none"> - British Film and Visual Culture - American Popular Culture and Media - Ethnic Literatures in the United States

Hungarian Literature and Linguistics BA

Degree:

Bachelor of Arts in Hungarian

Duration of training:

6 semesters

Language of instruction:

Hungarian with English as an intermediary language.

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 1,700 per semester (for non-EU students); EUR 1,600 per semester (for EU students)

Application fee:

EUR 140

DESCRIPTION OF THE PROGRAM:

The BA in Hungarian literature and linguistics program is designed to train experts in Hungarian language, literature and culture. The graduates will be equipped with both the academic knowledge and the relevant language and practical skills to analyze literary texts, linguistic and cultural phenomena in their wider intellectual, intercultural and historical contexts. Studying Hungarian language and literature at the University of Pécs entails the development and sophistication of student's language and reading skills, as well as to make comparative linguistic, literary and cultural analysis. The program offers to the students a training in academic Hungarian language and writing in order to activate and extend their linguistic competences and to increase their confidence in using written and spoken Hungarian in professional texts and discussions.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
<ul style="list-style-type: none"> - Introduction to Literary Studies - Introduction to Hungarian linguistics - Early Hungarian Literature I
2 nd semester
<ul style="list-style-type: none"> - Morphology - Phonetics and phonology - Hungarian Literature II.
3 rd semester
<ul style="list-style-type: none"> - Research methodology - Comparative literary studies (seminar) - World literature from the Age of Enlightenment to the 20th century
4 th semester
<ul style="list-style-type: none"> - Semiotics - Classical Hungarian literature (seminar) II. - Language practice 4.
5 th semester
<ul style="list-style-type: none"> - Literature in the first half of the 20th century (lecture) - World literature in the 20th century and today 2. - Psycholinguistics
6 th semester
<ul style="list-style-type: none"> - Literature in the second half of the 20th century (lecture) - History of modern drama and theatre 1. - Finno-Ugric Studies

Pedagogy BA (Intercultural Educational Assistant Specialization)

DESCRIPTION OF THE PROGRAM:

The aim of the program is to train educational professionals, who understand that education is a process of human, cultural and social development that takes place in the family/at home, in communities, in schools and the workplace.

You will learn about key issues facing contemporary societies, such as multiculturalism, minorities, xenophobia, segregation and inclusion as well as about education in terms of its sociological, psychological, historical and philosophical aspects. You will be assisted in building key competences, such as critical thinking, problem solving, conflict management, cooperation, assertive communication, as well as developing an attitude of openness and respect towards people from other cultural backgrounds, an attitude of global mindedness, valuing human dignity and cultural diversity. You will experience different teaching, learning and assessment methods including lectures, seminars, individual tuition, group-based, co-operative activities and individual and small group research projects. Student-centered pedagogies foster respectful, attentive and emphatic communication and can improve reasoning and collaboration skills, as well as adaptability.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
<ul style="list-style-type: none"> - Learning-Centered Communication - Pedagogical Beliefs - Education Systems
2 nd semester
<ul style="list-style-type: none"> - Comparative Education Sciences - Project Management - Developmental Psychology (and its Practical)
3 rd semester
<ul style="list-style-type: none"> - Intercultural Education - Education Policies of Minorities in Europe - Educational Psychology (and its Practical)
4 th semester
<ul style="list-style-type: none"> - Inclusive Society and Education - Integration, Segregation and Separation in Education - Conflict Management and Emotional Intelligence
5 th semester
<ul style="list-style-type: none"> - Critical Thinking - Case Discussion of Special Education - Basics of Curriculum Development
6 th semester
<ul style="list-style-type: none"> - Counselling Learners - Practical - Contemporary Arts and Education - Remembrance Education

Degree:
Philologist in Pedagogy BA (Intercultural educational assistant)

Duration of training:
6 semesters

Language of instruction:
English

Deadline for application:
30 June

Starting date:
September

Tuition fee:
EUR 2,500 per semester (for non-EU students);
EUR 2,100 per semester (for EU students)

Application fee:

“The University of Pécs is a welcoming intercultural environment with lovely people. Everything is provided for one to find their way through studies and university life. So far, it has been an epic journey and a wonderful experience for me that I will be truly thankful for.”

Nguyen Minh Ngoc, Pedagogy BA, Vietnam

For more information, please contact:

Ms. Vanda BÖCZIN-SIRKECI | International coordinator

E-mail: foreign.humanities@pte.hu | Phone: +36 72 501 500/64127;

Communication and Media Science BA

Degree:

Bachelor of Arts in Communication and Media Science

Duration of training:

6 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 2,800 per semester (for non-EU students);
EUR 2,100 per semester (for EU students)

Application fee:

EUR 140

DESCRIPTION OF THE PROGRAM:

The program, with a Digital Media and Public Relations specialization at Pécs prepares students for effective work in the fields of professional journalism (of traditional, electronic and online kinds), and Public Relations, advertisement and organizational communication. The program lays great emphasis on practical training in media production and the development of students' soft skills (empathic and assertive communication, teamwork, flexibility, creativity) and digital self-management capabilities.

We believe that with the spread of digital technologies fast and effective communication and online self-management became a must for companies and individuals alike, both globally and locally. We also believe that creative industries (e.g. advertisement, PR, design, organizational communication) are getting more and more important in commercial, institutional and NGO sectors, while the need for professionally trained journalists remains strong. As the very first department of communication and media in Hungary and with more than 25 years of experience in teaching we are keen to sharpen our students' sensitivities for, and offer them convertible knowledge about, how communication and media works and how it is to be managed efficiently both in a local, Central-European and global context.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
<ul style="list-style-type: none"> - Introduction to Social Communication - Cultural Anthropology - Interpersonal Communication
2 nd semester
<ul style="list-style-type: none"> - Visual Communication - Network Society Studies - The Social History of Communication
3 rd semester
<ul style="list-style-type: none"> - Photo, Video and Image Creation I. - Academic Writing - Social Media and Participatory Culture
4 th semester
<ul style="list-style-type: none"> - The Cultural Study of the Media - Mass Communication Systems and Institutions - Marketing and PR Basics
5 th semester
<ul style="list-style-type: none"> - Motion Picture and Media Analysis - Influencer Marketing - Journalism in Practice
6 th semester
<ul style="list-style-type: none"> - Media Regulation and Media Law - Media Economics - External Internship in Digital Media and PR

"The University of Pécs is the perfect place to learn. The locals are friendly and welcoming. The academic staff and lecturers are outstanding and supportive. I would therefore recommend everyone to attend this fantastic university."

Thai Nguyen, Communication and Media Science BA, Vietnam

Roma Studies BA (Romology)

(Specialization in Boyash language and culture /
Specialization in Romani language and culture)

DESCRIPTION OF THE PROGRAM:

The needs of Roma communities could be professionally and effectively represented by trained Romologists and the initiatives of the different organizations, institutions might be also represented through them among the local Roma communities in order to gain efficient communication to solve current issues. Collaborating with professionals from other fields – such as: sociologists, social politicians, teachers, lawyers, medical doctors, etc. – is essential for Romologists. In order to develop collaboration skills of our graduates, there are several courses during the program which are based on cooperative learning methods and group work. Field work and research methodology are in the core curriculum in order to prepare our graduates to work with real communities and other professionals after graduation. The two officially accepted languages spoken by Hungarian Roma are taught as well. Our graduates have the great chance to learn both of these languages: Boyash and Romani, and after 1 semester they could decide which languages they want to continue with to succeed a B2 level language exam till the end of their graduation. Not just the languages but their situation and sociolinguistic background are thought as well. The diverse content of this program provides a wide range of job opportunities, depending on what exact field of Romani Studies (education, social issues, minority rights, cultural anthropology, languages, etc.) is the most interesting for the given graduate.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st semester

- Introduction to Social Studies
- Learning-Centered Communication
- History of Roma
- Language Practice I. (Romani lexis)

2nd semester

- Contemporary Roma Art, Music, and Literature- Overview
- Language Practice I. (Boyash lexis)
- Introduction to Sociolinguistics, focusing on Bilingualism

3rd semester

- Ethnographic Studies on Roma Communities
- Sociolinguistics I.

4th semester

- Cultural Anthropology of Roma, Gypsies

5th semester

- Contemporary Roma art in Europe – Analysis

6th semester

- Language planning, language policy

Specializations:

- Specialization in Boyash language and culture
- Specialization in Romani language and culture

Degree:

Romologist (BA)

Duration of training:

6 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 2,500 per semester (for non-EU students);
EUR 1,700 per semester (for EU students)

Application fee:

EUR 140

Archaeology BA

Degree:

Philologist in Archaeology BA

Duration of training:

6 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 2,200 per semester
(for non-EU students);

EUR 1,700 per semester
(for EU students)

Application fee:

EUR 140

DESCRIPTION OF THE PROGRAM:

At the University of Pécs, Faculty of Humanities You may learn Archaeology on bachelor level. Our undergraduates develop their knowledge and skills in various methods of the theory and practice of archaeology to achieve successful careers as technicians of excavation projects or as potential members of resarch groups.

You will be suitable for the exploration, excavation and processing of archaeological sources and sites with the help of an archaeologist with master degree, as well as for the management of museum collections. You may also be familiar with other areas of cultural heritage in order to carry out the basic tasks in all institutions responsible for the exploration, protection, processing and presentation of cultural heritage. In addition, You can be prepared to continue Your studies in the Archaeology M.A. program.

You will experience different teaching, learning and assessment methods including lectures, seminars, individual tuition, group-based, co-operative activities as well as individual and small group research projects. Student-centered teaching foster respectful, attentive and emphatic communication and can improve reasoning and collaboration skills, as well as adaptability.

The University of Pécs is an Erasmus-partner of some distinguished Universities across Europe to research, develop and innovate in the field of archaeology.

The Archaeology B.A. curriculum at the University of Pécs contains obligatory excavation, survey, museological and museumpedagogical practice in collaboration with various institutions.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st semester

- Introduction to Classical, Roman, and Early Christian Archaeology
- Basic Skills of Latin Language
- Basic Skills of Research and Academic Writing

2nd semester

- Introduction to Philosophy
- Digital Measurement and Archaeological Documentation Techniques
- Optional subject

3rd semester

- Classical Archaeology
- Roman Archaeology
- Archaeological Research Methods

4th semester

- Archaeology of the Barbaricum and Migration Period
- Archaeological fieldwork (survey)
- Ancient Art History

5th semester

- Optional subject
- Excavation Practice
- Actual Questions in Archaeology and related sciences

6th semester

- Museology
- Museological Practice
- Museum Education Methods (practice)

Romance Philology and Cultures BA (Specialization in French Studies)

Licence en philologie romane (Spécialité d'Études françaises)

DESCRIPTION OF THE PROGRAM:

La Licence en Études françaises a l'intention de former des experts en sciences humaines ayant des connaissances et des compétences approfondies concernant la langue, la littérature, la linguistique et la civilisation françaises et francophones. Les personnes ayant obtenu un diplôme dans cette formation sont pourvues des connaissances académiques et pratiques. Par conséquent, elles sont capables de comprendre et d'analyser des textes littéraires, linguistiques et culturels. En même temps, elles maîtrisent la langue française en oral et en écrit, ainsi elles peuvent exprimer leurs idées dans un milieu francophone. Grâce aux compétences acquises lors de la formation, les étudiants ayant obtenu leur diplôme ont le choix de poursuivre leurs études ou bien s'insérer dans le marché du travail.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st semester

- Introduction à la linguistique
- Introduction à la littérature
- Exercices de langue
- Introduction à l'histoire de la langue et de la civilisation latines

2nd semester

- Grammaire descriptive
- Civilisation
- Analyse de textes

3rd semester

- Littérature française
- Développement des compétences langagières
- Communication professionnelle

4th semester

- Techniques d'expression écrite
- Introduction à l'économie
- Institutions internationales

5th semester

- Études européennes
- Correspondance commerciale
- Exercices du français des affaires

6th semester

- Techniques d'expression écrite
- Traduction de textes économiques

Degree:

Philologist in Romanistics,
Specialized in French Studies
BA

Duration of training:

6 semesters

Language of instruction:

French

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 2,200 per semester
(for non-EU students);
EUR 1,700 per semester
(for EU students)

Application fee:

EUR 140

For more information, please contact:

Ms. Vanda BÖCZIN-SIRKECI | International coordinator

Germanic Studies BA

(Specialisation German as Ethnic Minority Language)

Degree:

Philologist in Germanic Studies (Specialized in German as Ethnic Minority Language)

Duration of training:
6 semesters

Language of instruction:
German

Deadline for application:
30 June

Starting date:
September

Tuition fee:

EUR 2,200 per semester
(for non-EU students);
EUR 1,700 per semester
(for EU students)

Application fee:

EUR 140

DESCRIPTION OF THE PROGRAM:

Das Ziel des Studiengangs ist, Studierenden grundlegende Kenntnisse einerseits in den Kernbereichen der Germanistik, andererseits über die deutschsprachige Minderheit in Ungarn zu vermitteln. Die Studierenden erwerben die deutsche Sprache auf dem Niveau C1 des gemeinsamen europäischen Referenzrahmens, außerdem werden sie befähigt, allgemeine politische, wirtschaftliche, sowie sprach- und literaturwissenschaftliche Texte zu verstehen und zu produzieren. Studierende der Fachrichtung Deutsch als Minderheitensprache lernen darüber hinaus die Geschichte, den Sprachgebrauch, die Volkskultur und die Literatur der Ungarndeutschen kennen. Ein abgeschlossenes BA-Studium eröffnet zahlreiche Berufsperspektiven in verschiedenen Bereichen, wie z.B. in nationalen und internationalen Unternehmen, und berechtigt zum Zugang zu einem Masterstudium. Während des BA-Studiums entwickeln die Studierenden Kenntnisse und Kompetenzen in den folgenden Bereichen: deutsche Sprachkenntnisse auf dem Niveau C1; sprachwissenschaftliche Grundkenntnisse, Kenntnisse der Grammatik der deutschen Gegenwartssprache; Literatur der deutschsprachigen Länder; Landeskunde der deutschsprachigen Länder; Grundkenntnisse in Kultur- und Medienwissenschaft; Geschichte, Sprache, Literatur und Kultur der Ungarndeutschen; Präsentationstechniken.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st semester

- Einführung in die Minderheitenkunde
- Sprache und Kultur der germanischen Völker

2nd semester

- Geschichte der Ungarndeutschen
- Landeskunde deutschsprachiger Länder

3rd semester

- Materielle Kultur der Ungarndeutschen
- Flexionsmorphologie
- Deutsche Literatur und Kultur von der Frühen Neuzeit bis zur Klassik

4th semester

- Sprache der Ungarndeutschen
- Lexikologie
- Deutsche Literatur und Kultur von der Romantik bis zur Realismus

5th semester

- Deutsche Sprachinseln in Ungarn
- Syntax
- Deutsche Literatur und Kultur vom Naturalismus bis zur Mitte des 20. Jahrhunderts

6th semester

- Literatur der Ungarndeutschen nach 1945
- Sprachtypologie und kontrastive Linguistik

Romance Philology and Cultures BA (Specialization in Italian Studies)

Filologia romanza e cultura neolatina BA (Specializzazione in studi italiani)

Degree:

Philologist in Romanistics,
Specialized in Italian Studies
(BA)

Duration of training:

6 semesters

Language of instruction:

Italian

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 2,200 per semester
(for non-EU students);

EUR 1,700 per semester
(for EU students)

Application fee:

EUR 140

DESCRIPTION OF THE PROGRAM:

All'Università di Pécs, Facoltà di Lettere e Filosofia, si può studiare Lingua e Letteratura Italiana come corso di studi autonomo. Coloro che conseguiranno il diploma di laurea svilupperanno specifiche conoscenze e competenze attraverso teoria e pratica per avviarsi a una proficua applicazione lavorativa nell'ambito della cultura e lingua italiana.

Oltre l'approfondimento dei campi suddetti un'attenzione particolare va dedicata anche all'interdisciplinarietà. Inoltre, il corso dà la possibilità ai candidati di accedere a campi di studio e lavoro che vanno dal turismo fino ai vari livelli e modalità dei mass-media, informazione e comunicazione, oltre a muoversi con competenza nell'ambito dei beni culturali e del vasto universo della cultura italiana diffusa nel mondo.

Gli studenti sperimenteranno diversi metodi di educazione, di apprendimento e di valutazione includendo in essi corsi, seminari, tutoraggio, attività di gruppo o cooperazione, e anche progetti sviluppati in piccoli gruppi o individualmente. I metodi di pedagogia sono centrati sulle competenze dello studente e promuovono una comunicazione corretta, attenta e pretica, tale da migliorare sia le abilità nel ragionamento e nella collaborazione sia nell'adattabilità.

Tenuto conto che l'Università di Pécs ha ottimi rapporti con le migliori Università di tutta Europa, sarà offerta agli studenti iscritti la possibilità di partecipare a diversi corsi internazionali, organizzati dall'UE.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

Primo semestre

- Esercitazioni di lingua
- Introduzione agli studi letterari. Le letterature neolatine
- Geografia culturale
- Letteratura e comunicazione

Secondo semestre

- Conoscenza del paese. Culture regionali
- Metrica, retorica, stilistica
- Metodi di ricerca
- Linguistica documentale

Terzo semestre

- Rapporti diplomatici degli stati italiani del Cinquecento e del Seicento
- Storia della letteratura italiana
- La letteratura dialettale in Italia

Quarto semestre

- Storia del teatro
- Cinematografia delle culture neolatine
- Scienza e letteratura

Quinto semestre

- Semiotica dell'arte e della cultura musicale
- Conoscenza del Paese. Storia della civiltà

Sesto semestre

- Lessicologia, lessicografia
- Storia sinottica della linguistica italiana

For more information, please contact:

Slavonic Studies BA (Russian Philology)

Славянская филология (специальность: Русская филология)

DESCRIPTION OF THE PROGRAM:

Данная программа направлена на подготовку специалистов в области русского языка и литературы. Студенты научатся работать со сложноорганизованными текстами, относящимся к разным сферам культурной и социальной жизни. В программу включены курсы по языкознанию, истории и теории литературы, русской культуре и искусству, страноведению России. Уникальность данной программы состоит в том, что студентам также предлагается модуль по изучению делового русского языка и бизнес-коммуникации. Успешное прохождение этого модуля дает возможность выпускникам быть конкурентоспособными специалистами и за пределами научного филологического профиля. Данная программа обеспечивает качественно новый уровень подготовки студентов-филологов за счет соединения разнопрофильных дисциплин и их междисциплинарного взаимодействия.

Учеба в Венгрии дает возможность познакомиться с венгерскими традициями русской филологии, культурой самой Венгрии, а также позволяет лучше понять русскую культуру на контрасте с венгерской и получить навыки межкультурного взаимодействия.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

Первый семестр

- Коммуникационные технологии в эпоху информатики
- Общественные знания
- Введение в языкознание
- Введение в литературоведение

Второй семестр

- Библиотечное дело и работа с информацией
- Фольклор: мифология, народная поэзия
- Венгерско-славянские языковые связи
- Страноведение

Третий семестр

- Основы стилистики
- Практическая грамматика русского языка
- Венгерский как иностранный
- Русская литература до середины XIX века

Четвертый семестр

- Практикум по русскому языку и стилистике
- Лексика и семантика
- Русский язык в экономике
- Золотой век русской культуры

Пятый семестр

- Деловая переписка на русском языке
- Техника перевода
- Русская литература с середины XIX века до наших дней
- Серебряный век русской культуры

Шестой семестр

- Аудирование
- Протокол и этика
- Межкультурная коммуникация
- Современная русская культура

Degree:

Slavonic Studies, Philologist
in Russian Studies (BA)

Duration of training:

Romance Philology and Cultures BA

(Specialization in Spanish Studies)

Lenguas y Culturas Neolatinas BA

(especialidad en Estudios Hispánicos)

**Degree:**

Philologist in Romanistics,
Specialized in Spanish
Studies (BA)

Duration of training:

6 semesters

Language of instruction:

Spanish

**Deadline for application:**

30 June

Starting date:

September

**Tuition fee:**

EUR 2,200 per semester
(for non-EU students);
EUR 1,700 per semester
(for EU students)

Application fee:

EUR 140

DESCRIPTION OF THE PROGRAM:

El programa (BA) de Estudios Hispánicos (Lenguas y Culturas neolatinas mención Estudios Hispánicos) del Departamento de Estudios Hispánicos e Iberoamericanos del Instituto de Romanística de la Universidad de Pécs consta de 180 ECTS distribuidos en 1) Módulo de Introducción: Humanidades y Ciencias Sociales (12 ECTS), 2) módulo de Asignaturas básicas y troncales (108 ECTS), 3) Especialización en Lenguaje para fines específicos (50 ECTS) y 4) bloque de Cursos optativos (10 ECTS). El programa tiene una duración de tres años (seis semestres).

EXAMPLES OF SUBJECTS DURING THE STUDIES:**1st semester**

- Introducción a la Lingüística I
- Introducción a la Literatura I
- Filosofía

2nd semester

- Prácticas de Morfosintaxis 2
- Examen básico
- América Latina durante la Guerra Fría

3rd semester

- Historia de la literatura española hasta 1681
- Prácticas de la lengua española V
- Los pueblos de España

4th semester

- Historia de Hungría siglo XX
- Español como Lengua Extranjera
- Lenguaje para fines específicos 2

5th semester

- Literatura hispanoamericana s. XX
- Traducción y lenguaje para fines específicos
- Redacción y oratoria

6th semester

- La lírica hispanoamericana
- Lectura de textos literarios (s. XX)
- Tesina (BA)

Liberal Arts BA (with various majors)

DESCRIPTION OF THE PROGRAM:

In the Western cultural tradition liberal arts education has always been the ultimate mark of an educated person, and still today it provides a comprehensive education in the humanities with the foundation knowledge to enter a number of careers in cultural life, education, and government, or to go straight into graduate study in any subject of humanities. The core aim of the curriculum is to develop well-rounded individuals with general knowledge of a wide range of subjects and with mastery of a range of transferable skills. It is designed to enable students to develop critical thinking and problem-solving skills, effective oral and written communication skills, and a sense of social responsibility. You will be taught in small, interactive seminar groups, encouraging discussion and debate with teaching staff and fellow students.

You will study a combination of required and optional modules, and choose a subject in which you will major, so no two Liberal Arts students have exactly the same program. The program offers you outstanding flexibility, balancing breadth of knowledge across disciplines with the opportunity for in-depth study in a field of your choice. The program is structured with a system of major - a package of 80 study credits - and minor - 50 study credits to be chosen among the other liberal arts fields - and with required core courses.

Available majors: Art History, Classical Studies, Ethics, Film and Visual Studies, Philosophy

Detailed information on the majors: *international.pte.hu/study-programs/ba-liberal-arts-majors-art-history-classical-studies-ethics-film-and-visual-studies*

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st semester

- Academic Writing
- Introduction to European Cultural History
- Introduction to Social and Political Philosophy
- Introduction to Art History
- English For Academic Purposes

2nd semester

- Art History: Interpretation of Art
- Classical Studies: Representation
- Ethics: Language, Rhetorics, Narration
- Film and Visual Studies: Mediality
- Philosophy: Logic

3rd semester

- Art History: Romanesque and Gothic Art
- Classical Studies: The Legacy of the Ancient World for the Modern West
- Ethics: Contemporary Problems in Ethics
- Film and Visual Studies: Introduction to Film Analysis
- Philosophy: Ancient Philosophy

4th semester

- Art History: Understanding the Built Environment
- Classical Studies: Classical Literature
- Ethics: Bioethics
- Film and Visual Studies: Film and Society
- Philosophy: Modern and Contemporary Philosophy

5th semester

- Art History: 20th Century Art
- Classical Studies: Games and Contests in the Ancient World
- Ethics: Introduction into Ecology
- Film and Visual Studies: Film History
- Philosophy: Philosophy of History and Religion

6th semester

- Art History: Institutions of Art
- Classical Studies: Ancient Art and Iconography
- Ethics: Philosophy of Economics and Business Ethics
- Film and Visual Studies: Genre and Adaptation Theory
- Philosophy: Philosophy of Politics and Society

Degree:

Bachelor of Arts in Liberal Arts

Biotechnology BSc

Degree:

Bachelor of Science in
Biotechnology

Duration of training:

6 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 3,500 per semester

Entrance exam fee:

USD 250

Registration fee:

USD 220

DESCRIPTION OF THE PROGRAM:

The Academic Program offered by the Faculty of Pharmacy leads to the degree of Biotechnologist. The program provides deep theoretical understanding of natural sciences with hands on experience in cutting edge technologies in biotechnology. The diploma issued by the Faculty of Pharmacy is accepted by all European Union member states and several other countries. The program aims to educate students to become immediately employable after graduation, hence industrial or research laboratory placements for sufficient work experience are integral part of the program. Using state of the art laboratory techniques students can also experience laboratory research and have a great variety of further education possibilities to choose from in medical, pharmaceutical, environmental and food biotechnology. The Biotechnologist BSc diploma entitles its holder to work at industrial test laboratories, industrial research and development laboratories, work in production for the pharma or biotechnology industry or work for contract research laboratories in small biotechnology companies or research institutes. But the graduates will be fully equipped with knowledge to pursue a career in biostatistics and bioanalytics.

If they choose to do so, graduates can enroll into Biotechnology MSc, Biomedical Engineering MSc, Clinical Laboratory Scientist MSc, etc programs at the University of Pecs or other further education programs of Universities in the European Union or in a wide variety of countries after graduation. As the program is only taught in English, it also provides a vibrant international environment to study in.

The diploma program consists of three years of basic and special studies. The first year and a half are devoted to basic sciences. The program provides essential knowledge in the foundation module in general, inorganic and organic chemistry, analytical chemistry, physical chemistry, physics and biophysics, plant, animal and human biology and physiology, as well as mathematics. Special studies involve biochemistry, microbiology, genetics, molecular biology, genetic manipulation, immunology, basics in pharmaceutical, medical, food and environmental biotechnology, data management, analysis and biostatistics. In the 6th semester students must submit a written Thesis, and in the 5th-6th semester they are engaged for 6 weeks in a practical training program in industry or in a research laboratory.

For more information, please contact:

Civil Engineering BSc

DESCRIPTION OF THE PROGRAM:

This program is accredited by the Institute of Building Construction and meets the requirements of training innovative, up-to-date civil engineers who will design cities with a structure after graduation. This wide scientific and engineering field covers large structures and constructions, building engineering, management of infrastructure like bridges and highways, municipal water and wastewater systems. Study of these fields comprises learning classical engineering sciences such as mathematics, natural sciences and economics. In addition to engineering subjects, the program provides training in computer and communication skills. Although most graduates are employed to work in the field of planning, design or management, they may also be involved in construction engineering, structural engineering, transportation and urban planning, or set up their own independent practice.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
<ul style="list-style-type: none"> – Materials Science – Fluid Mechanics in Engineering 1. – Building constructions 1.

2 nd semester
<ul style="list-style-type: none"> – Construction materials 1 – Strength of materials 1 – Basics of structural design

3 rd semester
<ul style="list-style-type: none"> – Geographic information systems 1 – Geodesy field practice – Reinforced concrete structures 1.

4 th semester
<ul style="list-style-type: none"> – Structural analysis 1. – Timber and masonry structures – Hydrology field practice

5 th semester
<ul style="list-style-type: none"> – Environment Protection for Engineers – Public utilities – Road and railway design 1.

6 th semester
<ul style="list-style-type: none"> – Building services engineering – Structural diagnostic practice 1. – Steel-concrete composite structures

7 th semester
<ul style="list-style-type: none"> – Underground structures – Structural dynamics 1 – Hydraulic engineering

8 th semester
<ul style="list-style-type: none"> – Structural diagnostic practice 2 – BSc Thesis

Degree:

Bachelor of Science in Civil Engineering

Duration of training:

8 semesters (full-time training)

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

USD 3,400 per semester

Application fee:

USD 150

“The University of Pécs in the time I have been here has been my second home. I vividly remember my first day here, total stranger and I was scared. In just 3 years I have made lifelong friendships and lived once in a lifetime experiences.”

Fidel Gatimu, Civil Engineering BSc, Kenya

For more information, please contact:

Centre for International Programmes and Relations

Computer Science Engineering BSc

Degree:

Bachelor of Science in Computer Science Engineering

Duration of training:

7 semesters

Language of instruction:

English

Deadline for application:

15 June

Starting date:

September

Tuition fee:

USD 3,400 per semester

Application fee:

USD 150

DESCRIPTION OF THE PROGRAM:

The degree program provides subjects and advanced research opportunities in the sphere of computer engineering, such as software engineering, data networks, information systems, cost efficient solutions in engineering and manufacturing. Large components of the studies are laboratory oriented and covering software engineering and programming skills. The program provides experience in being part of an information technology team working on real projects. The aim of the program is to equip students with a solid skillset in modern techniques and provide quality instruction needed for a professional career in the field of information technology engineering.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
<ul style="list-style-type: none"> - Algorithm design - Engineering Mathematics - Programming 1
2 nd semester
<ul style="list-style-type: none"> - Foundations of Informatics - Electronics 1
3 rd semester
<ul style="list-style-type: none"> - Databases - IP Based Systems
4 th semester
<ul style="list-style-type: none"> - Information and Code Theory - Software Engineering
5 th semester
<ul style="list-style-type: none"> - Programming Paradigms Design, UX, Ergonomy
6 th semester
<ul style="list-style-type: none"> - Project work Web programming

“Moving to such a picturesque city to study in one of the best institutions in Hungary at such a crucial and vital stage of my life to shape my future was one of the best decisions I have made to date. It gives me immense pleasure to name my university as the first one in Hungary. Likewise, I always get impressed with everyone’s humble gestures, and help, starting from the university professors to a local pedestrian. I always believe Pécs provides me with enough time, space, and atmosphere to grow, explore myself, and work on my future career even more.”

Maisha Maimuna, Computer Science Engineering BSc, Bangladesh

Mechanical Engineering BSc

DESCRIPTION OF THE PROGRAM:

This programme is aimed at professionals with an interest in mechanical engineering in the built environment and industrial fields who desire a strong component of practical work. The aim is to provide education to a bachelor level in mechanical engineering, to cater to industry on the national and international market; our graduated professionals are able to excel in the contemporary world of engineering. The program includes modules in the practical aspects of planning and industrial management sciences, as well as in systems engineering studying mechanical, mechatronical and electronic aspects, simulation of engineering systems and numerical modelling, quality control and innovation techniques. Students also learn how to develop research and presentation skills. The faculty's international connections with other universities allows students to apply for scholarships for studying abroad and taking part in workshops. The education is made up of laboratory work, projects and examinations, lectures and field practice spent at one of the industrial partners of the Institute of Mechanical Engineering.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
<ul style="list-style-type: none"> - Fluid Mechanics in Engineering - Technical drawing 1 - Environment Protection for Engineers
2 nd semester
<ul style="list-style-type: none"> - Strength of materials - Machine Elements - Thermodynamics
3 rd semester
<ul style="list-style-type: none"> - Structural Materials Technologies - Machining Technologies - Mechanical Materials
4 th semester
<ul style="list-style-type: none"> - Electrical Engineering - Pipes and Fittings - Quality Management
5 th semester
<ul style="list-style-type: none"> - Polymer Technology - Heat treatment - Welding technologies
6 th semester
<ul style="list-style-type: none"> - Polymer Technology - Heat treatment - Welding technologies
7 th semester
<ul style="list-style-type: none"> - Molding and Shaping - Flexible Manufacturing Systems and Robotics

Degree:

Bachelor of Science in Mechanical Engineering

Duration of training:

7 semesters (full-time training)

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

USD 3,400 per semester

Application fee:

USD 150

Architectural Engineering BSc

Degree:

Bachelor of Science in Architectural Engineering

Duration of training:
7 semesters

Language of instruction:
English

Deadline for application:
30 June

Starting date:
September

Tuition fee:
USD 4,000 per semester

Application fee:
USD 150

DESCRIPTION OF THE PROGRAM:

This program covers engineering design, structures and construction management. Education takes place in cooperation with other design and engineering professionals. Students are expected to have good visual skills, a grasp of mathematics and the history of architecture. The program focuses on the responsibility of the architect in building design, the detailed development of building systems and team work. This degree course aims to give students a clear understanding of the key contexts of architecture and the built environment, the design relationships among people, architectural space and the environment – through live projects and contemporary situations. It comprises of lectures, workshops and studio design work. The Institute of Architecture Engineering has contacts with a vibrant national and international community made up of leading architects and related researchers. Students will engage in perspective projection, drawing, computer graphic design and model building. Graduate students can further their architectural skills at a master level at our faculty.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
<ul style="list-style-type: none"> - Mechanics - Basics of Architecture
2 nd semester
<ul style="list-style-type: none"> - Descriptive Geometry - Practice in Design - History of Architecture
3 rd semester
<ul style="list-style-type: none"> - Construction Technology - Geodesy - Building Construction
4 th semester
<ul style="list-style-type: none"> - Theory of Architecture - Urban Studies - Building Services Engineering

Pre-school Teacher BA

DESCRIPTION OF THE PROGRAM:

Pre-school Teaching BA Program is designed for students who want to pursue a career in early years education, to work with children between the ages of 3 to 7 years. The Program is conducted by innovative approaches and provides several practices from the first semester to ensure real professional experiences for our students. An extended range of optional modules and a varied number of courses empower students for the challenges that can occur in pre-schools in the 21st century. The balance between traditional and alternative methods and the child-centered educational practices we satisfy our main aim, that is, to train future pre-school teachers with high expertise of both theoretical and practical knowledge that are essential for the pre-school teaching.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st semester
<ul style="list-style-type: none">- Introduction to Psychology- Introduction to Pedagogy- Individual Comprehensive Practice
2nd semester

Classical Music Singing BA

Degree:

Bachelor of Arts in Classical Singing

Duration of training:
6 semesters

Language of instruction:
English

Deadline for application:
1 June

Starting date:
September

Tuition fee:
EUR 4,500 per semester

Application fee:
EUR 100

DESCRIPTION OF THE PROGRAM:

The course helps students prepare for their role as a teacher. Its goal is to map out this task, to increase self-awareness, to understand and interiorize this role and to initiate taking on this task. It is important for students to interpret the activities, pedagogical roles and tasks in a pedagogical environment, from the teacher's perspective. Students should learn that motivation, evaluation, the environment, the relationship with parents, the planning of the pedagogical process, and the adaptive change of all these in the real situation, are essential tools for the role of music teacher. They need to understand that preparing for this task requires serious concentration, commitment and preparation. This requires self-knowledge, self-reflection, self-acceptance, balanced psychological immunity, professional, pedagogical and psychological knowledge. The backbone of the course is the processing of students' views on the subject of education, which should be replaced by a well-established professional knowledge of the role of the teacher.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st semester

- Chamber Music (Contemporary Music Practice)
- Voice Health Studies
- Folk Music

2nd semester

- Practice with Répétiteur
- Foreign Language for Singers
- Repertoire Studies

3rd semester

- Professional Methodology
- Hungarian and Universal Music History
- Solfeggio

4th semester

- Music Theory
- Piano
- Choir / Orchestra

5th semester

- Social Psychology
- Teaching Profession
- Ethics

6th semester

- Voice Part Rehearsal
- Diploma Concert

Classical Instrumental Music Performance (Piano, Guitar, Violin, Viola, Flute) BA

DESCRIPTION OF THE PROGRAM:

The goal of our BA programs in the field of classical music is to train professionals who shall be able to enrich and spread Hungarian and European music tradition via their performance as musicians. With the help of both the practical and theoretical knowledge acquired through the program, they shall possess refined taste as well as technical knowledge in music. All those awarded a BA degree shall be ready and able to serve in orchestras, choirs and chamber ensembles alike. They shall be able to become genuine actors of the culture sector in institutions engaged in music. They will have the necessary academic, technical and professional knowledge to gain admission to master level education in their field.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
<ul style="list-style-type: none"> - Chamber Music (Contemporary Music Practice) - Main Subject – Performance Methodology - Folk Music
2 nd semester
<ul style="list-style-type: none"> - Concert Attendance - Continuo - Rhythm Practice
3 rd semester
<ul style="list-style-type: none"> - Improvisation - Hungarian and Universal Music History - Solfeggio
4 th semester
<ul style="list-style-type: none"> - Music Theory - Piano - Choir / Orchestra
5 th semester

Designer Making BA – Specializing in Ceramics Design

Degree:

Bachelor of Arts in Ceramics
Design

Duration of training:

6 semesters

Language of instruction:

English

Deadline for application:

1 June

Starting date:

September

Tuition fee:

EUR 4,500 per semester

Application fee:

EUR 100

DESCRIPTION OF THE PROGRAM:

Our Designer Making BA program offers an opportunity to practice and improve in a wide range of activities. Students are introduced to the possibility of experimenting and combining design, material research, 3D design and 3D printing, a wide range of materials from paper to concrete. We believe in studio-focused education and training. The campus is located on the premises of the Zsolnay Cultural Quarter, where the beautiful historical buildings are filled with the atmosphere of pure culture. We are the only training center in Hungary where students can experience such a wide scale of design and making which will enable our students to solve assignments related to either design, craftsmanship, autonomous works of art or contemporary architecture alike. Students are invited to try all branches of this beautiful profession and decide for themselves which branch they wish to deal with more deeply.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
<ul style="list-style-type: none"> – Visual Studies 1. – Creative Design Studies – Cultural Anthropology
2 nd semester
<ul style="list-style-type: none"> – Studioceramics – Design methods – History of Design
3 rd semester
<ul style="list-style-type: none"> – Art History – History of Philosophy – Industrial product design

Orchestral and Choral Conducting BA

DESCRIPTION OF THE PROGRAM:

Aim of the program: To educate musicians who – with their performing skills, theoretical knowledge, and highly developed musical abilities – enrich and spread the Hungarian and European music culture. They can enrich the repertoire of musical knowledge with their sophisticated musical taste and are able to work in musical institutions, professional performing ensembles and in other occupations which require music education. The program enables students to combine training in choral conducting with vocal studies. It is an important part of the training to become familiar with rehearsal work. The choral conducting program includes foundation classes such as philosophy, aesthetics, art history, music history, acoustics and subjects like piano, chamber music, chamber singing as well besides conducting technique and style.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
<ul style="list-style-type: none"> – Philosophy – Music History – Choral Conducting
2 nd semester
<ul style="list-style-type: none"> – Folk Music – Solfeggio – Conducting Practice
3 rd semester
<ul style="list-style-type: none"> – Human and Child Studies – Compulsory Piano – School observation (Choral)

Electronic Music and Media Arts BA

Degree:

Bachelor of Arts in Electronic Music and Media Arts (Electronic Music Media Assistant)

Duration of training:

6 semesters

Language of instruction:

English

Deadline for application:

15 May

Starting date:

September

Tuition fee:

EUR 4,500 per semester

Application fee:

EUR 100

DESCRIPTION OF THE PROGRAM:

This program is recommended for those, who are interested in sound, noise, silence and their electronic / digital forms. For those, who don't accept the media of sound and vision in the closed box, but would rather open it for experimenting, improvising. Therefore, for those, who are interested in sound art, interactive arts, networked projects and performative arts. We have been running educational projects since 1996 in the field of electroacoustic music, video art and design, presenting a special role in the faculty, where both of the fine arts and classical music students cooperate in the projects. With the BA program in electronic music and media arts we cover the gap in the study of electronic music and in wider perspective, specialize in the arts of new media.

STUDY PLAN:

Ground knowledge: philosophy, contemporary aesthetics, network laws, culture and art history, history of music, acoustics

General professional knowledge: music theory, timbre-solfège, musical informatics and media knowledge, psychoacoustics, electronic music notation, performance practice

Specialized professional knowledge: computer music projects, composition practice, stylistic exercises in computer music, sound synthesis and analysis

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
<ul style="list-style-type: none"> - Philosophy - Aesthetics - Music history, folk music history
2 nd semester
<ul style="list-style-type: none"> - Cultural sciences and art history - Music theory - Hearing development (special solfège)
3 rd semester
<ul style="list-style-type: none"> - Music informatics and media studies - Psychoacoustics - Performance practice
4 th semester
<ul style="list-style-type: none"> - Electronic music notation - Concert practice - Computer music project realization
5 th semester
<ul style="list-style-type: none"> - Electronic and contemporary music style and repertoire, research - Sound synthesis and analysis - Electronic music practices
6 th semester
<ul style="list-style-type: none"> - Diploma work consultation

“My time at the University of Pécs has been an incredible journey of growth and discovery. From the vibrant international community to the supportive professors, every moment has been a chance to learn and connect. The campus is alive with culture and creativity, and the city itself feels like an extension of the university - warm, welcoming, and full of opportunities. I’ve gained not only knowledge in my field but also lifelong friends and unforgettable experiences. Choosing the University of Pécs was one of the best decisions I’ve ever made!”

Computer Science Engineering BSc,
India**

One-tier Master Programs

Architecture (BSc+MSc)

Degree:

Master of Science in Architecture

Duration of training:
10 semesters

Language of instruction:
English

Deadline for application:
30 June

Starting date:
September

Tuition fee:
USD 4,000 per semester

Application fee:
USD 150

DESCRIPTION OF THE PROGRAM:

This program trains students to apply their complex knowledge in the areas of architecture and urban planning, as well as in the field of environment formation in general (architectural design, town and country planning, preservation of built heritage, structural design, construction work, management and administration tasks, consulting with authorities, teaching, etc.) Within the professional field of architecture, students acquire individual expertise in a specific field and can apply for admission to the DLA & PhD degree program based on their specialization.

If the applicant has already obtained a university degree (bachelor degree in Architecture or other relevant field), it is possible to apply for admission to the master level part of the program.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st semester

- Design Studio 1.
- Building Constructions 1.

2nd semester

- Strength of Materials 1.
- Art History

3rd semester

- Digital Architecture 1.
- History of Architecture 1

4th semester

- Energy Systems 1.
- Digital Architecture 2.

5th semester

- Architectural Drawing 4.
- History of Architecture 3.

6th semester

- Introduction to Professional Practice
- Architectural Theory

7th semester

- Lectures on Ecodesign
- Digital Presentation

8th semester

- Urban Planning
- Lectures on Experimental Design

9th semester

- Lectures on Theory of Architectural Design 1
- Heritage Protection

10th semester

- Lectures on Theory of Architectural Design 2.
- Complex Design 4.

“I have received immense assistance from the mentors at my faculty, lecturers and administrative staff. The safe environment has harbored a feeling of peace that has helped me succeed in my academic grades as well as excel in social life.”

Nasir Bappah Dukku, Architecture OTM, Nigeria

General Medicine in English/German (Allgemeine Humanmedizin)

DESCRIPTION OF THE PROGRAM:

The general medicine program in Pécs provides a strong foundation for a medical career in a continuously evolving profession. The six-year curriculum includes pre-clinical and clinical studies, as well as a full year of supervised clinical rotations. From the early years, students gain direct patient experience in hospital wards and operating theatres, which plays a key role in developing practical medical skills.

The program progresses from studying the structure and functions of the healthy human body, through learning about pathological processes and basic patient examination techniques, to understanding specific diseases and developing diagnostic and therapeutic skills. Most clinical training is practice-oriented and takes place in real medical settings. The diploma is recognized in all European Union countries and several others, including Norway, the USA, Canada, and Israel.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

Basic and pre-clinical module

- Natural sciences: biochemistry, molecular biology, genetics, biostatistics, and medical chemistry
- Core medical subjects: anatomy, physiology, pathology, microbiology, pharmacology, clinical biochemistry, and medical imaging
- Behavioral sciences: medical ethics, medical psychology, communication, and social sciences

Core curriculum

- Major clinical fields including internal medicine, surgery, pediatrics, obstetrics, neurology, psychiatry, emergency and intensive care medicine, oncology, radiology, dermatology, family medicine, as well as several optional and elective subjects.

Degree:

M.D.

Duration of training:

6 years (M.D.)

Language of instruction:

English/German

Deadline for application:

30 June

Starting date:

September

Tuition fee:

English program: USD 16,750 per year (USD 9,000 for the first and USD 7,750 for the second semester) /German program: EUR 7,500 per semester

Application fee:

English program: USD 200/
German program: EUR 200

Registration fee:

English program: USD 220 /
German program: EUR 220

Entrance exam fee:

English program: USD 250 (if taken in Pécs) /German program: -

I've had an amazing experience in Pécs so far. I have made lifelong friends from different parts of the world and made memories I'll never forget. My faculty has been supportive and helpful in every way I needed. The professors and staff are passionate and friendly. The city is beautiful and everything you need is at your disposal. Coming to study at the University of Pécs was one of the best decisions I've made in my life.

Carla Schrieber, General Medicine, South Africa

Dentistry in English/German (Zahnmedizin)

Degree: D.M.D.

Duration of training: 5 years

Language of instruction:
English/German

Deadline for application:
30 June

Starting date: September

Tuition fee:

English program: USD 17,350* per year (USD 9,300 for the first and USD 8,050 for the second semester) / German program: EUR 7,720 per semester

Application fee:

English program: USD 200 + USD 250 entrance exam fee
German program: EUR 200

Registration fee:

English program: USD 220 / German program: EUR 220

*Please note that the annual tuition fee for Dentistry includes the cost of dental materials/ semester.

DESCRIPTION OF THE PROGRAM:

The curriculum of the five-year program (10 semesters) is designed to unify the basic and clinical sciences, as it is believed that scientific and professional development cannot be sharply separated but should proceed concurrently throughout the program. In the basic module of first two years, the students are taught basic sciences – medical and dental courses –, which constitute the foundation of clinical dentistry. In the pre-clinical module students, become more familiar with the intensive clinical study of each of the various disciplines of dentistry that they continue with in the clinical module with more emphasis on the assessment and management of patients. Furthermore, in this final module students participate in elective programs, clinical conferences and hospital-based placements. After the successful completion of the program, students are awarded the title Doctor of Dentistry.

All European Union countries and several other countries (Norway, USA, Canada, Israel etc.) recognize the diploma issued by the Medical School.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

Basic and pre-clinical module

- Basic module: foundation subjects (physics, chemistry, biochemistry cell biology), morphology, molecular biology, pathology (general and oral pathology, general and oral pathophysiology, general and oral microbiology, functional biology, behavioral studies (psychology, sociology, ethics)
- Pre-clinical module: introduction into clinical studies (internal medicine, surgery, dental pre-clinics), diagnostics, public health (economics), pharmacology (pharmacotherapy, toxicology)
- Clinical module: complex knowledge of diseases and therapies (medical genetics, internal medicine, surgery, dermatology, ophthalmology, ENT, diseases of oral mucosa, pediatrics, obstetrics, gynecology, neurology, psychiatry, axiology, etc.) and optional subjects.

Dental clinical module

- preventive dentistry, oral diagnostics, maintenance dentistry, oral surgery, restorative dentistry (implants), pediatric dentistry, orthodontics and optional subjects.

Pharmacy

DESCRIPTION OF THE PROGRAM:

Pharmacy profession has evolved greatly during the past decades. Primary focus has drifted from the product (manufacturing and logistics) to the patient (counselling, advanced services and prevention). Main roles of pharmacists – as essential and valuable members of the health-care team – are developing new medicines and improving their use for better health. As emphasized by the International Pharmaceutical Federation (FIP), pharmacists are patient advocates and care providers who provide and facilitate efficient access to quality medicines with the goal of helping patients make the best use of their medication therapy.

The Academic Program offered by the Faculty of Pharmacy leads to the Pharmacy degree with a Dr. Pharm title. This program extends over a period of five years (10 semesters). It begins with an introduction to the basic sciences providing a basis for further pharmaceutical studies. In the second part of the program, students obtain general and specialized pharmaceutical competencies (knowledge, skills and attitudes) at the university departments and laboratories. The Pharmacy diploma entitles its holder to work at public (community) and hospital pharmacies, all stakeholders of the drug supply value chain, pharmaceutical industry, drug research and development, authorization and academia.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

Basic module

- Mathematics, informatics, biostatistics, physics-biophysics, general chemistry, inorganic chemistry, organic chemistry, analytical (qualitative, quantitative) chemistry

Medical-biology module

- Pharmaceutical biology, biochemistry, anatomy, physiology, pathophysiology, microbiology, immunology, public health, pharmaceutical botany, first aid, Latin.

Professional module

- Pharmaceutical chemistry, Biotechnology, pharmacognosy, pharmaceutical analysis, pharmaceutical technology, biopharmacy, pharmacodynamics, Pharmaceutical practice and management including administrative pharmacy, clinical pharmacy, pharmaceutical ethics, pharmaceutical care and numerous optional subjects.

Degree:

Dr. Pharm

Duration of training:

5 years (10 semesters)

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

8,400 EUR (4,400 EUR for the 1st and 4,000 EUR for the 2nd semester)

1st semester

- Innovation and Innovation Management
- Entrepreneurship and Business Model Generation
- Corporate Entrepreneurship

2nd semester

- Entrepreneurial Finance
- Project Management
- Advanced Marketing Research

3rd semester

- Start-up Development
- Applied Venture Valuation

4th semester

- Practicum: SME development
- Strategic Management

Degree:

Master of Science in Business Development

Duration of training:

4 semesters

Language of instruction:

English

Deadline for application:

September 30 / May 31

Starting date:

February / September

Tuition fee:

EUR 3,150 per semester for non-EU students and EUR 1,300 per semester for EU students

Application fee:

EUR 150

“Studying at the University of Pécs has been a great journey. The study department of the faculty has always supported me, and I have had the opportunity to learn from professors with different background whose insights are extremely valuable. I have also had the opportunity to make friends from around the world and learn from different cultures which have nurtured my personal and professional development.”

Maria Del Pilar Gutierrez Mendez, Business Development MSc, Mexico

For more information, please contact:

Ms. Mária LAJOS | International coordinator

Biotechnology MSc

Degree:

Master of Science in
Biotechnology

Duration of training:
4 semesters

Language of instruction:
English

Deadline for application:
30 June

Starting date:
September

Tuition fee:
EUR 5,500 per semester

Application fee:
USD 200

Entrance exam fee:
USD 250

Registration fee:
USD 220

DESCRIPTION OF THE PROGRAM:

The MSc course aims to educate biotechnologists who possess a high level of theoretical and practical knowledge of biotechnology with medical and pharmaceutical sciences in focus. The curriculum is practice-oriented and provides the necessary skills for graduates to start work immediately after graduation in the biotech or pharma industries or to enroll in a PhD program. The program provides opportunities for students to become involved in research activities in various departments of the Faculties of Medicine and Science or to prepare diploma work in biotechnology-based SMEs (Small or Medium Enterprises) or in the pharmaceutical industry. The University is a member of the European Biotechnology Network, an association that actively supports the program.

SPECIALTY IN MEDICAL BIOTECHNOLOGY

The program provides ample theoretical and hands-on-experience in Molecular Pathogenesis, Drug Research, Toxicology, Transdifferentiation, 3D Tissue Models, Autologous Tissue Transplantation etc.

SPECIALTY IN PHARMACEUTICAL BIOTECHNOLOGY

The program suits current industrial needs in the fields of biotechnology, bioproductions and biopharmaceuticals. The training employs the IMT® method and provides industrial certificate.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

- Genetics
- Capillary Electrophoresis in Laboratory
- Diagnostics
- Epigenetics - Non-Genetic Inheritance and Its Medical Aspects
- Microbiology
- Molecular Basis of Microbial Pathogenesis
- Signal Transduction
- Urinary Steroid Profiles
- Biotechnological Methods in Forensic Medicine
- Enzyme Biotechnology
- Molecular and Functional Genetics, Genomics
- Molecular Developmental Biology and Transdifferentiation
- Biotechnology from a Business Perspective

For more information, please contact:

Ms. Livia CSIDEI | Office Manager of English Admissions and Student Service Office

Phone: +36 72 536 018; +36 72 536 009 | E-mail: studentservice.center@aok.pt.ehu

Website: www.admissions.medschool.pt.ehu

Recreation MSc

DESCRIPTION OF THE PROGRAM:

The aim of the training is to educate recreation management professionals who are capable to positively influence the society's lifestyle through the development of an active, health-oriented leisure culture. They, thereby, effectively contribute to life-quality improvement of various target groups and individuals. Furthermore, they are able to take on leadership, managerial, and advisory roles and tasks in sports organizations, particularly in leisure sports, as well as in recreation and health promotion, in healthcare, social, educational institutions, and civil organizations. Graduates of the program are prepared to continue their studies in doctoral programs.

FUTURE EDUCATION OPPORTUNITIES:

In the various doctoral schools of the University of Pécs, such as the Doctoral School of Biology and Sport Biology

FUTURE JOB OPPORTUNITIES:

Graduates from our institution have a good chance of finding employment in private and publicly funded service providers within recreational, tourism, health tourism, sports, social recreation, and healthcare systems. Specifically, those who obtain their degrees from the Faculty of Sciences at the University of Pécs can expect primarily organizational and leadership positions within their field.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st year

- Recreational sports I (fundamental sports, sport games)
- Recreational sport training theory and methodology
- Fitness evaluation
- Theory and practice of mental hygiene, basics of addictology

2nd semester

- Recreational sports II (fitness, dance)
- Prevention, physical therapy, rehabilitation
- Diagnosis and therapy of the skeletal and muscle system deformities, applied rehabilitation

3rd semester

- Exercise physiology
- Research in recreation
- Tourism marketing

4th semester

- Dietetics, sports nutrition

Degree:

Master of Science in Recreation

Duration of training:

4 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

1 September

Tuition fee:

EUR 8,000 per year

Application fee:

EUR 140

For more information, please contact:

International office

Phone: +36 72 503-600/24283 | E-mail: contact@gamma.ttk.pte.hu

Website: <http://www.ttk.pte.hu/en>

Geoinformatics MSc

Degree:

Master of Science in
Geoinformatics

Duration of training:

4 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 8,000 per year

Application fee:

EUR 140

DESCRIPTION OF THE PROGRAM:

During this 4-semester Master's degree program, our students will focus on Geographic Information System (GIS) methods and remote sensing tools applications. They will have the opportunity to join in and participate in research and scientific projects run by IGES. The Institute has research collaborations with global companies and international relations with research groups from Switzerland, Poland, Spain, Slovenia, China, and the US. These projects may provide internships for our students to experience the international atmosphere and scientific skills and knowledge. The master's program provides a broad spectrum of GIS, Earth observation, CAD, WebGIS, Database management, GIS programming surface modeling, and 3D visualization-related disciplines for all international students. The program also includes a six-week professional practice at self-selected private and public businesses and companies, however, the practice is also available at the university and at the IGES. By completing the professional practice, the student will gain a broad range of practical and project management skills and knowledge to explain, analyze, interpret and execute various planning programs.

WHY SHOULD YOU STUDY GEOINFORMATICS MSC AT THE FACULTY OF SCIENCES OF THE UNIVERSITY OF PÉCS?

GIS (Geographic Information System) is the cutting-edge science and device, which helps create, manage, analyze, and map all types of data. GIS helps users understand patterns, relationships, and geographic context. The benefits include improved communication and efficiency as well as better management and decision-making. Being a topic of such a broad aspect it offers opportunities for gaining general and specific knowledge in any spatial sciences and a great selection for jobs in various fields.

FUTURE JOB AND EDUCATION OPPORTUNITIES:

A degree in geography from the University of Pécs opens many new doors in terms of your career choices. Due to the GIS knowledge, students may find jobs where the application of either GIS or any related fields is indispensable. Therefore, students may find their future career as a GIS specialist, agrarian database analyst, emergency management specialist, surveyor and location analyst, pollution analyst, remote sensing analyst, business/marketing analyst and WebGIS expert, among many other jobs out at the job market.

1st year

- Geographical Applications of GIS
- Modeling and simulations in geosciences
- GIS Programming
- Surface Modelling
- Geomathematics
- Physical Principles of Remote Sensing
- Earth observation
- GIS Hardware Assembly & Testing
- Spatial databases
- Application of CAD systems in Earth sciences practice
- Legal norms and regulation of GIS

2nd year

- Geologic process modeling
- WebGIS
- Earth Observation
- GIS Programming
- Application of photogrammetric and geoinformatic methods in hydrological modeling practice
- 3D Visualization
- Fieldwork
- GIS Project

For more information, please contact:

International office

Phone: +36 72 503-600/24283 | E-mail: contact@gamma.ttk.pte.hu

Website: <http://www.ttk.pte.hu/en>

Earth Sciences MSc

DESCRIPTION OF THE PROGRAM:

The Earth Sciences master's program provides a multi-disciplinary approach: field work, analytical methods, lab experiments, numerical simulation, e-learning, case study analysis, and teamwork. It will allow you to understand the natural processes which have shaped Earth in deep time through to those that generate environmental change today. In addition, you'll undertake courses designed to broaden your understanding of the role of science in society and industry and to improve your science communication skills.

WHY SHOULD YOU STUDY EARTH SCIENCES MSC AT THE FACULTY OF SCIENCES OF THE UNIVERSITY OF PÉCS?

A master's degree in earth sciences can lead you down a wide range of professional paths in science, environmentalism, education, and much more. Study in the Institute of Geography and Earth Sciences: experience research-led teaching from renowned scientists, and enjoy life-changing, free field trips. Acquire invaluable skills and hands-on experience ahead of an exciting career without limitation. In the IGES, staff, students, and alumni have contributed through work on public engagement, water quality, soil ecology, geo-energy, and teaching on different MSc degree programs, to name just a few of our inputs. You'll join a close-knit, multicultural student community and benefit from small-group working and a close working relationship with renowned, world-leading teachers in their field.

FUTURE JOB AND EDUCATION OPPORTUNITIES:

A Master of Science in Earth Sciences gives you the opportunity to gain a wide range of knowledge and skills that are relevant for employment in industry, energy, natural resources, government agencies, the environmental sector, and education, as well

as in wider science and policy areas. The MSc in Earth Sciences has a very successful track record in terms of postgraduate employment at the professional level. Graduates take up careers in the public and private sectors in Hungary and the EU, and many have gone on to reach senior levels in industry, academia, and governmental positions, in the EU and overseas. Many take up Ph.D. opportunities and move into research. A number have won national and international awards

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st year

- applied geophysics
- geochemical analysis
- sedimentology
- hydrology
- hydrogeological modeling
- atmospheric physics
- pedology
- applied geomorphological mapping
- raw materials' value chains
- modeling and simulation in earth sciences
- geological instrumentation and analysis
- geological process modeling
- geological mapping fieldwork

2nd year

- paleoenvironmental reconstruction
- paleoclimatology
- physical geographical perspective on climate change
- case studies in environmental geology
- geological research
- GIS database modeling
- applied mathematics for earth sciences
- environmental geology in the field
- regional geology
- Earth observation
- diploma work practice

This program will not start in the 2026/27 academic year.

For more information, please contact:

International office

Phone: +36 72 503-600/24283 | E-mail: contact@gamma.ttk.pte.hu

Website: <http://www.ttk.pte.hu/en>

Degree:

Master of Science in Earth Sciences

Duration of training:

4 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 8,000 per year

Application fee:

EUR 140

Biology MSc

Degree:

Master of Science in Biology

Duration of training:

4 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 8,000 per year

Application fee:

EUR 140

DESCRIPTION OF THE PROGRAM:

The Biology MSc line offers full 2-year-education in biology. The study program for full-time training offers a complete education in biology, with special directions particularly in molecular biology (neurobiology, genetics, microbiology), and animal and plant ecology. Special directions from the second semester offer more laboratory practice in molecular biology or more courses in ecology. The basic subjects are presented in lectures, seminars and laboratory or fieldwork. The program provides a wider view of the related scientific fields (biophysics, biological chemistry). The students will familiarize their knowledge with the most modern instrumentation in our new research center. It covers all aspects of education, research and innovation in the fields of biomedical, natural and environmental sciences. It also provides an opportunity to join the research work in 22 different research groups operating in the building.

EXAMPLES OF SUBJECTS DURING THE STUDIES:
1st year

- Biophysics lecture
- Molecular Cell Biology lecture and practice
- Developmental and Stress Physiology of Plants lecture
- Molecular Genetics lecture
- Biological chemistry lecture and practice
- Regeneration Biology and Tissue Engineering
- Basic Forestry and Forest Research seminar

2nd year

- Biotechnology lecture
- Conservation Biology lecture
- Immunobiology lecture and practice
- DNA Techniques
- Genomics
- Evolutionary Biology lect.
- Diploma Work Practice
- Cellular and Integrative Neuroscience practice
- Data Processing in Vegetation Science practice

FUTURE JOB AND EDUCATION OPPORTUNITIES:

- Further Doctoral Studies in Biology (PhD)
- Higher education institutions
- Research institutes
- Health care industry
- Food industry
- Pharmaceutical industry
- Agriculture industry
- Biotechnology companies
- Nature conservation institutions
- Environmental protection institutions.

For more information, please contact:
International office

 Phone: +36 72 503-600/24283 | E-mail: contact@gamma.ttk.pte.hu

 Website: <http://www.ttk.pte.hu/en>

Chemistry MSc

DESCRIPTION OF THE PROGRAM:

The courses are open from September, each year, and are continued during a 4-semester cycle. The students who have studied chemistry, biochemistry, physics, and pharmacy in undergraduate level (BSc) will continue their knowledge at Master of Science level. The subjects of the Chemistry MSc studies include Advanced mathematics, Solid phase physics, Molecular biology, Coordination chemistry, Elemental organic chemistry, Advanced physical chemistry, Instrumental analysis, Theoretical chemistry, Organic chemistry of natural compounds, Surface chemistry, Proteins and protein networks, Advanced chemometry, Environmental technology, Pharmaceutical chemistry, Radiochemistry, and several more specific applied chemistry subjects. The education is composed from theoretical lectures, tutorial seminars and practical sessions. Students in the fourth semester prepare a diploma-work in an experimental topic, which will be defended, and they pass a general final exam for getting the diploma.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st year

- Colloid chemistry
- Organometallic chemistry
- Homogeneous Catalysis
- Reaction kinetics
- Nuclear magnetic resonance practice
- Applied UV-VIS, IR and Raman spectroscopy
- Applied mass spectrometry
- Radiochemistry

2nd year

- Instrumental Analysis special practice
- Theoretical Chemistry
- Basics of chemical engineering
- Environmental chemistry
- Denoted chemical reactions in organic chemistry
- Environmental colloid chemistry
- Instrumental Analysis special practice
- Diploma Work Practice

FUTURE JOB AND EDUCATION OPPORTUNITIES:

- Further study opportunities for Chemistry PhD
- Research institutes
- Higher education institutions
- Environment protection companies
- Public sector – law and patents
- Healthcare
- Chemical engineering
- Pharmaceutical industry
- Industrial chemistry
- Food and drink companies
- Teaching
- Science journalism
- Forensic science
- Clinical laboratories

Degree:

Master of Science in Chemistry

Duration of training:

4 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 8,000 per year

Application fee:

EUR 140

For more information, please contact:

International office

Phone: +36 72 503-600/24283 | E-mail: contact@gamma.ttk.pte.hu

Website: <http://www.ttk.pte.hu/en>

Applied Mathematics MSc

Degree:

Master of Science in Applied Mathematics

Duration of training:

4 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 8,000 per year

Application fee:

EUR 140

DESCRIPTION OF THE PROGRAM:

The aim of the Applied Mathematics master program is to train professionals who have a well-grounded mathematical and informational knowledge in a theoretical and practical way. They are able to gain knowledge in industrial, commercial, agricultural, logistics, communication, finance and computer science issues to be used for analysis, modelling and finding a solution for them. Furthermore, the best ones are able to keep going on in doctoral level training and deepen their skills and knowledge.

FUTURE JOB AND EDUCATION OPPORTUNITIES:

- Higher education institutions - researcher and professors in colleges & universities
- Statistical data analysis
- Combined defense service (air force, naval academy)
- Higher Management Position in public sector & banks
- Operations research analysts
- Computer systems analysts
- Data analyst
- Financial advisor
- Positions in technology related sector
- Actuary
- Statisticians

EXAMPLES OF SUBJECTS DURING THE STUDIES:
1st year

- Fundamentals of algebra and number theory lecture and practice
- Fundamentals of analysis lecture and practice
- Geometry and computer graphics lecture and practice
- Cryptography lecture and practice
- Ordinary differential equations seminar lecture and practice
- Codes and symmetrical structures lecture and practice

2nd year

- System engineering laboratory work and lecture
- Mathematics of Networks lecture
- Design of Algorithms and Data Structures seminar
- Complexity Theory
- Statistics and applications seminar
- Partial differential equations seminar and lecture
- Diploma Work Practice

This program will not start in the 2026/27 academic year.

For more information, please contact:
International office

Phone: +36 72 503-600/24283 | E-mail: contact@gamma.ttk.pte.hu

Website: <http://www.ttk.pte.hu/en>

Physics MSc

DESCRIPTION OF THE PROGRAM:

In the Physics MSc course, we offer comprehensive knowledge. Those skills and subject groups such as Modern Physics, Optics and Laser Physics, Physics of Quantum Systems, Atomic and Molecular Physics encompass the science of the main areas of Physics based on the bachelor's level of Physics. Practical courses and seminars provide students with hands-on skills.

The seminars and practical courses outnumber the number of lectures in the curriculum. This is a good reflection of our preference for learning methods based upon active student participation. We encourage students' activity with homework, self- project tasks, and we support cooperative learning methods. The subjects of Quantum Systems and Laser Physics are closely related to the important research areas of the Institute of Physics.

Courses create a foundation for writing theses related to Quantum-Optics, Quantum Informatics, Laser Physics, and Nonlinear Optics and Terahertz Physics subjects and for student research work. Furthermore, students are prepared to enter a doctoral program. A variety of elective and optional courses allows students to deepen their knowledge in subjects that correspond to their individual interests.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st semester

- Mathematical methods in physics practice
- Signals and systems lecture and practice
- Nuclear and partial physics lecture and practice

2nd semester

- Atomic and molecular physics lecture
- Numerical Mathematics seminar
- Condensed matter practice and lecture

3rd semester

- Laser physics seminar
- Femtosecond and nonlinear optics

4th semester

- Quantum optics seminar
- Quantum information seminar
- Thesis writing

FUTURE EDUCATION AND JOB OPPORTUNITIES:

- Further Doctoral Studies in Physics (PhD)
- Higher education institutions - research, teaching, research-development
- Join international research institutes - e.g. CERN
- ELI Super Laser projects - ELI-ALPS Research Institute
- Macroeconomic analysis workplaces (risk analysis)
- Economic analysis
- Consulting companies
- IT industry
- Information system operators
- Information system developers

Degree:

Master of Science in Physics

Duration of training:

4 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 8,000 per year

Application fee:

EUR 140

For more information, please contact:

International office

Phone: +36 72 503-600/24283 | E-mail: contact@gamma.ttk.pte.hu

Website: <http://www.ttk.pte.hu/en>

Geography MSc

Degree:

Master of Science in
Geography

Duration of training:

4 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 8,000 per year

Application fee:

EUR 140

DESCRIPTION OF THE PROGRAM:

During this 4-semester Master degree program, our students will focus on GIS methods and remote sensing tool applied in surface geomorphology both in a classroom environment and in the field. They will have the opportunity to join in and participate in research and scientific projects run by IGES. The Institute has research collaborations with global companies like ESA and SARMap, and international relations with research groups from Switzerland, Poland, Spain, Slovenia, China and the US. These projects may provide internships for our students to experience the international atmosphere and scientific skills and knowledge.

The master program provides a broad spectrum of geography and related disciplines and combines environmental geography, geomorphology and GIS for all international students. The program also includes a six-week professional practice at self-selected private and public businesses and companies; however, the practice is also available at the university and at the IGES. By completing the professional practice, the student will gain a broad range of practical and project management skills and knowledge to explain, analyze, interpret and execute various planning programs.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st year

- Geographical Applications of GIS
- Landscape Ecology and Land Evaluation
- Geographical Approaches in Regional Development
- GIS Programming I.
- Space, Society and Sustainability
- Geomathematics
- Regional Geography of the Continents
- Engineering and Anthropogenic Geomorphology

2nd year

- Earth Observation
- Geomorphic Systems
- Surface Modelling
- Applied Geomorphological Mapping
- Practical Applications of GIS
- Diploma Work Practice

FUTURE JOB AND EDUCATION OPPORTUNITIES:

Due to the Geomorphology/GIS specialization, students may find jobs where the application of either geomorphology, GIS or any related fields are indispensable. Therefore, students may find their future career as a

- geomorphologist
- geospatial analyst
- climate change analyst
- climatologist
- hydrologist
- meteorologist
- pollution analyst
- surveyor
- town planner
- water conservation officer

among many other jobs out at the job market

English Studies MA

DESCRIPTION OF THE PROGRAM:

The goal of the degree program is to train experts in the field of English Studies who have sound theoretical, methodological and practical knowledge of the English language and can apply such knowledge in practice. They have thorough knowledge and understanding of the literature, culture and the social and political systems of English-speaking countries, including Great Britain, Ireland and Canada, the major trends and research fields of modern theoretical and applied linguistics and their results that mainly apply to the English language. They can apply the acquired knowledge in the business sector, the media, education, diplomacy, at institutions engaged in international relations, in tourism, the publishing sector, tender agencies, local, regional and national government offices and, in general, in the cultural public sphere. They are prepared to pursue studies in doctoral degree programs. The program is offered to full-time students as well as in the form of a correspondence program.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
<ul style="list-style-type: none"> - The System of English in a Historical Perspective (seminar) - Research Methodology (seminar)
2 nd semester
<ul style="list-style-type: none"> - Current Issues in Literary and Cultural Studies (lecture) - Individual Differences in SLA (seminar) - A Cultural History of Literary Genres in Britain (lecture and seminar)
3 rd semester
<ul style="list-style-type: none"> - Metaphor and Thought (seminar) - The Gothic and Fantastic in English Literature (seminar)
4 th semester
<ul style="list-style-type: none"> - New Englishes (seminar) - English Corpus Linguistics (seminar) - British and Postcolonial Literature II.

Degree:

Master of Arts in English Studies

Duration of training:

4 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 2,500 per semester (for non-EU students);
EUR 1,900 per semester (for EU students)

Application fee:

EUR 140

“Along the pressure of research papers and stressful exams, our professors maintain a supportive and understanding approach throughout the semester. There is no such thing as a stupid question, as everything is explained and answered properly. This positive atmosphere is widely sensed around campus and the city. People are very helpful and understanding, and they are very accepting of different cultures and backgrounds. I recently had conversations about culture, politics, psychology, and music with different people around the same table!”

Lojain Honaity, English Studies MA, Jordan

For more information, please contact:

American Studies MA

Degree:

Master of Arts in American Studies

Duration of training:

4 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 2,500/semester
(for non-EU students);
EUR 1,900/semester
(for EU students)

Application fee:

EUR 140

DESCRIPTION OF THE PROGRAM:

Our program in American Studies offers a comprehensive overview of the field at the graduate level. Students are required to take core courses in the different subfields of American Studies and in related areas such as cultural studies and cultural history, the social sciences and research methodologies, historical linguistics, popular and visual culture, etc. All these pave the way for the individual research students are required to undertake for their thesis in North American literature and literary studies in an interdisciplinary manner. The thesis supervised by our colleagues at the Institute of English Studies is to be handed in in the fourth semester and defended in order to earn an MA in American Studies.

EXAMPLES OF SUBJECTS DURING THE STUDIES:
1st semester

- Advanced Studies in American Literature
- Advanced Studies in American History
- Major Issues in American Studies
- Cultural Studies in the US

2nd semester

- Theory and Practice of American Studies
- Aspects of US Culture and Society
- US Politics & Culture
- Literature & Identity Politics
- Historical Fiction in North American Literary Contexts

3rd semester

- American Literary History & Literary Theory
- Research Methodology
- American Political Institutions
- American Literary Institutions
- American Literature & Popular Culture

4th semester

- The History of American English
- Media & New American Literatures
- The Social Sciences in North American Studies
- American Literatures in International Context

For more information, please contact:

Human Resources Counselling MA

DESCRIPTION OF THE PROGRAM:

The purpose of this course is to educate and train professionals who are experts in providing help to organizations and companies regarding any area of human resources management, one of the functional areas of leadership counselling.

Special attention is given to career planning and counselling, and a major subject is devoted to equal opportunity and the treatment of disadvantaged groups. According to the tradition of this faculty, students will also deal with employment policy, adult education and sustainable development as well as the interdependence of education and the labour market.

From among the practical skills to be developed, the abilities of counselling and conflict management will especially be pointed out. The curriculum also arranges a compulsory professional field practice, by which particular skills and knowledge acquired will be applied in practice.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

- Organizational Psychology
- The Method of Counselling
- The Operation of HR Organizations
- Career Guidance
- Theory of Human Resources Counselling
- Practice of Human Resources Counselling

Degree:

Master of Human Resources
Counselling

Duration of training:

4 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 2,200 per semester
(for non-EU students);
EUR 1,700 per semeste
(for EU students)

Application fee:

EUR 140

“Choosing University of Pécs to continue my academic career has been one of the best choices I ever made. Once I crossed its doors I haven’t stopped being amazed by all the things I had the opportunity to meet; excellent academic quality given by remarkable professors, students and colleagues from all over the world which share their knowledge and experiences as well making day by day experience something unforgettable and, in any place you can find friendly people, marvelous places, amazing food and fun experiences. In summary, Pécs is a synonym of home.”

Velky Siomara Baez, Human Resources Counselling MA, Colombia

For more information, please contact:

Ms. Vanda BÖCZIN-SIRKECI | International coordinator

E-mail: foreign.humanities@pte.hu | Phone: +36 72 501 500/64127;

Psychology MA

Degree:

Master of Arts in Psychology

Duration of training:
4 semesters

Language of instruction:
English

Deadline for application:
30 June

Starting date:
September

Tuition fee:

EUR 3,900 per semester
(for non-EU students);
EUR 2,900 per semester
(for EU students)

Application fee:
EUR 140

DESCRIPTION OF THE PROGRAM:

The aim of the program is to train professionals, who will be qualified in more branches of psychology and gain special knowledge in the field of Counselling and School Psychology. They will study the methodologies and instruments used in psychology, and will be able to use these with individuals, groups or organizations especially schools for their understanding and development. The program provides adequate training to acquire further, legally stipulated, specialized qualifications in the various fields of psychology. They will be prepared to continue their studies at the doctoral level.

The main areas where this degree is applicable: clinical psychology and healthcare services, hospitals, ambulances; individual and group counselling; school psychology; pedagogical centers; coaching; organization development; sport psychology.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
<ul style="list-style-type: none"> - Basics of psychodiagnostics and abnormal psychology - Diagnostic Methods in School Psychology - Practicum – School Psychology I. - Observation, Assessment
2 nd semester
<ul style="list-style-type: none"> - Life Skills Counselling - Practicum – School Psychology II. - Behavior Management - Practicum - Counselling I. - Individual Counselling
3 rd semester
<ul style="list-style-type: none"> - Diagnostic Methods in Career and Employment Counselling - Talent management and development methods - Practicum - Counselling II. - Family Counselling
4 th semester
<ul style="list-style-type: none"> - Theories of Crisis - Art, Creativity, Psychology - Practicum – School Psychology IV. - Work with Special Needs Students

“The master’s program provides an education that exceeds my expectations. Pécs is amazing city to be student. The staff in our department is really competent in their field, and they help us a lot to prepare us for our careers. I am glad to be there.”

Cansel Kaya, Psychology MA, Turkey

International Relations MA

DESCRIPTION OF THE PROGRAM:

The International Relations MA is an interdisciplinary program addressing global political, social, and economic challenges. It aims to educate critically minded graduates with a strong foundation in the social sciences who can analyze international processes objectively and from multiple perspectives. The curriculum covers political systems, global issues, developing regions, Asia, as well as European and Central and Eastern European affairs.

The two-year program combines theoretical knowledge with practical skills in diplomacy, negotiation, and international analysis, preparing graduates for careers in international organizations, NGOs, diplomacy, public administration, journalism, and further doctoral studies. Teaching is delivered by an internationally experienced academic staff and draws on cross-faculty expertise from the Faculties of Humanities, Business and Economics, and Law. Studying in Pécs, a truly international city in the heart of Central and Eastern Europe, provides an excellent academic environment and strong graduate employability outcomes.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
<ul style="list-style-type: none"> – European Paradigm from the Ancient Ages to the Present Day – Globalization, Mundialization – International Political Economy
2 nd semester
<ul style="list-style-type: none"> – Modern Political Philosophy – International Business – Foreign Policy of the USA
3 rd semester
<ul style="list-style-type: none"> – Diplomatic and Consular Relations – Political Geography, Geography of Security – Political Culture – International Cultural Relations
4 th semester
<ul style="list-style-type: none"> – European Monetary Integration – Theory and Practice of Diplomacy in a Global Context
Specializations
<ul style="list-style-type: none"> – European Studies – Regional and Civilization Studies

Degree:

Master of Arts in International Relations

Duration of training:

4 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 2,500 per semester (for non-EU students);
EUR 1,900 per semester (for EU students)

I truly like the environment at the University, professors and students they all are very helpful, subjects are very interesting and the materials they give us is worthy to read. I recommend international students to come and study in Pécs if they want to live in a beautiful and little city where they have a possibility to either walk or cycle everywhere, to have a feeling of safety everywhere they go and every time even if they walk alone in the midnight. Nothing can be compared to the feeling when you are 30 people in one class and 95% of them is from different countries, because as a result of it you study not only your profession but the traditions, culture and way of living of other people.

Mariami Jintcharadze, International Relations MA, Georgia

Social Policy MA

Degree:

Master of Arts Social Policy
(Social Policy Expert (MA))

Duration of training:
4 semesters

Language of instruction:
English

Deadline for application:
30 June/30 November

Starting date:
September/February

Tuition fee:

EUR 2500 per semester
(for non-EU students);
EUR 1900 per semester
(for EU students)

Application fee:
EUR 140

DESCRIPTION OF THE PROGRAM:

The aim of the program is to train social policy professionals who, with their acquired theoretical and methodological knowledge, are able to participate in the formulation of policies in various fields of societal and social policy, contribute to the operation of the service system, represent social interests, engage in theoretical and empirical research, and in the development of social policy education. They are prepared to continue their studies in doctoral programs.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st semester

- Historical and comparative social policy
- Social problems and societal responses
- Analysis of social income transfers
- Program Evaluation
- Social policy and economy

2nd semester

- Analysis of Social and other Human Services
- Social policy and law
- Organizational and Leadership Psychology

3rd semester

- Social Problems in Urban and Rural Areas
- Integration of theory and praxis in local social policy
- Contemporary Methods in Family and Elderly Protection

4th semester

- Community Work
- Regional and local development policy
- Internship (Social Policy Practicum)

For more information, please contact:

Ms. Vanda BŐCZIN-SIRKECI | International coordinator

Social Work MA

DESCRIPTION OF THE PROGRAM:

The study program is designed to train social workers who are competent in reflective social work practice and are prepared to introduce professional innovations. As professionals, they utilize their extensive knowledge and specific competencies in human behavior and in social systems, serving the purposes of social integration, strengthening democratic relations, protecting human rights and promoting human development. They are able to elaborate on social issues and conduct research to work out professional alternatives; design, manage and evaluate social services; and represent the profession in a variety of public spheres. Study requirements are in accordance with international scientific results and professional expectations. Students are prepared to continue their studies to obtain a PhD degree.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st semester

- Contemporary Theories of Social Work
- Program Evaluation
- International Aspects of Social Work
- Social Problems and Societal Responses

2nd semester

- Dilemmas in Social Policy
- Analysis of Social and other Human Services
- Organizational and Leadership Psychology

3rd semester

- Specialization Module: General Social Work
- Specialization Module: Clinical Social Work
- Psychosocial Counselling in Social Work
- Social Policy Theories (Historical and Comparative Social Policy)
- Individual Casework

4th semester

- Analyzing Group Work Processes
- Community Work
- Social work field practice

Degree:

Master of Arts Social Work
(Social Worker (MA))

Duration of training:

4 semesters

Language of instruction:

English

Deadline for application:

30 June/30 November

Starting date:

September/February

Tuition fee:

EUR 2,500 per semester
(for non-EU students);
EUR 1,900 per semester
(for EU students)

Application fee:

EUR 140

For more information, please contact:

Ms. Vanda BÖCZIN-SIRKECI | International coordinator

Archaeology MA

Degree:
Archaeologist (MA)

Duration of training:
4 semesters (full-time training)

Language of instruction:
English

Deadline for application:
30 June

Starting date:
September

Tuition fee:
EUR 2,200 per semester
(for non-EU students);
EUR 1,700 per semester
(for EU students)

Application fee:
EUR 140

DESCRIPTION OF THE PROGRAM:

At the University of Pécs, Faculty of Humanities and Social Sciences you may learn Archaeology on master level. Our graduates develop their knowledge and skills in various methods of the theory and practice of archaeology to achieve successful careers as leaders of excavation projects, as museologists or as potential members of research groups.

You will be suitable for the exploration, excavation and processing of archaeological sources and sites, as well as for the management of such museum collections. You may be also familiar with other areas of cultural heritage in order to carry out the basic tasks in all institutions responsible for the exploration, protection, processing and presentation of cultural heritage. In addition:

You will have the knowledge needed to fill the position of an archaeologist-museologist. You can be prepared to continue Your studies in Ph.D. programs.

You will experience different teaching, learning and assessment methods including lectures, seminars, individual tuition, group-based, co-operative activities as well as individual and small group research projects. Student-centered teaching foster respectful, attentive and emphatic communication and can improve reasoning and collaboration skills, as well as adaptability.

The University of Pécs is an Erasmus-partner of some distinguished Universities across Europe to research, develop and innovate in the field of archaeology.

The Archaeology MA curriculum at the University of Pécs contains obligatory excavation, survey, museological and museumpedagogical practice in collaboration with various institutions

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st semester

- Museology
- Practice in a Hungarian Museum
- Thesis consultation

2nd semester

- Classical Archaeology (art and religious iconography)
- Economy and Social Archaeology and its Background in Archeological Theory
- Optional subject

3rd semester

- Settlement- and Social History and Burial Customs
- Conflict Archaeology
- Research seminar

4th semester

- Illegal art crime
- Optional subject
- Thesis consultation

For more information, please contact:

Ms. Vanda BŐCZIN-SIRKECI | International coordinator

E-mail: foreign.humanities@pte.hu | Phone: +36 72 501 500/64127;

+36-30-1861686 | Website: <https://btk.pte.hu/en>

Adult Education MA (Andragogy)

DESCRIPTION OF THE PROGRAM:

At the University of Pécs, Faculty of Humanities you may study Andragogy/Adult Education as a Single Honours degree. Our graduates develop their knowledge and skills through theory and practice in adult learning and education to achieve successful careers in adult and vocational education, work-place learning, second chance education with basic skills development, coaching and counselling, community education and community development, educational policy and research, international development and special education needs.

You will learn about key issues of adult and lifelong learning contemporary societies are facing, such as participation/access, provision, equity, performance, equality, delivery/methodologies, inclusion as well as about education and learning in terms of its sociological, psychological, historical and philosophical aspects.

You will experience different teaching, learning and assessment methods including lectures, seminars, individual tuition, group-based, co-operative activities and individual and small group research projects. Student-centered pedagogies foster respectful, attentive and emphatic communication and can improve reasoning and collaboration skills, as well as adaptability.

Since the University of Pécs is an Erasmus-partner of some distinguished Universities across Europe to research, develop and innovate in the field of adult education/andragogy, enrolled students will be offered to participate an EU-funded international winter-school program in the second year of Master Studies so as to develop practical skills and knowledge together with students of partner universities to study adult education and lifelong learning in the countries represented in the program.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st semester

- Theories of Adult Learning: Andragogy and Gerontology
- Lifelong Guidance
- Learning Cities-Regions and Learning Communities

2nd semester

- The Psychology of Adult Learning
- The Role of Law in Adult Education
- Adult Education and the Labour Market

3rd semester

- Ethics of Adult Education
- Adult Education Research and Development - Comparative Studies in ALE
- Illiteracy, Second Chance Schooling and Adult Education

4th semester

- ALE and Human Resource Development
- Open and Distance Education and e-learning

Degree:

Adult Educator (Andragogue)
MA

Duration of training:

4 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 2,500 per semester
(for non-EU students);
EUR 1,900 per semester
(for EU students)

Application fee:

EUR 140

For more information, please contact:

Ms. Vanda BÖCZIN-SIRKECI | International coordinator

E-mail: foreign.humanities@pte.hu | Phone: +36 72 501 500/64127;

+36-30-1861686 | Website: <https://btk.pte.hu/en>

History MA

Degree:
MA in History

Duration of training:
4 semesters (full-time training)

Language of instruction:
English

Deadline for application:
30 June

Starting date:
September

Tuition fee:
EUR 2,500 per semester

Application fee:
EUR 140

DESCRIPTION OF THE PROGRAM:

The curriculum includes different forms of study methods, combining lectures and seminars with individual tutorial courses as well as the opportunity of an “on the spot” practical training in archives and museums. It also includes visits of relevant historical sites.

A competent staff member will be assigned to you immediately after the beginning of the first semester as a tutor (in accordance with the topic of your intended thesis) who will supervise you in writing your thesis and provide continuous consultation.

The curriculum aims to be interdisciplinary: this character is reflected in the subjects of the shared mandatory courses to be taken by all students regardless of the chosen chronological specialization, and in the range of fields covered within the given specialization (e.g. palaeography, iconography, history of ideas). The Medieval and Early Modern History specialization and the Modern History specialization give equal weight to General History and Central European History: Hungarian History is presented as part of Central European History. This approach enables you to connect events of Central European History with well-known phenomena of the European past, and understand current problems.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st semester

- Philosophy of History and Schools of Historiography (shared mandatory course, regardless of the field chosen)
- Political Structures and State Development (shared mandatory course, regardless of the field chosen)
- Ancient History: Current Issues in the Political History of Antiquity

2nd semester

- Medieval and Early Modern History: Major Problems in European and Hungarian Medieval History
- Modern History: Economic History of the 18th -20th Centuries

- Historical Demography and Social History (shared mandatory course, regardless of the field chosen)
- Ancient History: Current Issues in the Social and Economic History of Antiquity
- Medieval and Early Modern History: Political Iconography and Metaphors of State
- Modern History: Diplomacy, Military History, Change of Geopolitical Constellations in the 18th- - 20th Centuries

3rd semester

- History of Manners of Life and Mentalities (shared mandatory course, regardless of the field chosen)
- Ancient History: Current Issues in the Cultural History of Antiquity
- Medieval and Early Modern History: Historical Roots of European Regionalism, and the Origins of Intellectual Constructions (Western Europe, Central Europe, Eastern Europe, the Balkans)
- Modern History: History of Mentalities, Cultures, and Ideas in the 18th -20th Centuries

4th semester

- Ancient History: Current Issues in the Religious History of Antiquity
- Medieval and Early Modern History: Empires of “Eastern Europe” – The Habsburg, the Russian, the Ottoman Empires
- Modern History: Political Ideas, Intellectual Movements, Political Systems in the 18th -20th Centuries

For more information, please contact:

+36-30-1861686 | Website: <https://btk.pte.hu/en>

Instruction of English as Foreign Language MA

DESCRIPTION OF THE PROGRAM:

The Instruction of English as a Foreign Language program will help you develop an in-depth understanding of the links between professional practice, theory, and research in the area of teaching English as a second/foreign language.

You will have the opportunity to:

- develop the knowledge and skills required to design engaging tasks for various age-groups and proficiency levels,
- create language teaching materials for various contexts (e.g. materials for young learners, adults, English for Specific Purposes)
- develop skills to integrate language and content (e.g. stories, culture, other subject areas)
- explore essential processes in learning and teaching language,
- practice teaching in real-life contexts,
- develop skills for conducting classroom-based research in your own classes.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st semester

- Techniques and Principles in TEFL
- Language Development for EFL teachers
- Learning and Teaching Vocabulary
- A Task-Based Approach to Content and Language Integrated Learning

2nd semester

- Teaching Culture and Intercultural Communication
- Contemporary English and American Literature in TEFL
- Digitally Enhanced Learning and Teaching
- Assessing Foreign Language Performance

Degree:

Instruction of English as Foreign Language MA

Duration of training:

2 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 2,200 per semester

Application fee:

EUR 140

For more information, please contact:

Ms. Vanda BÖCZIN-SIRKECI | International coordinator

E-mail: foreign.humanities@pte.hu | Phone: +36 72 501 500/64127;

Sociology MA (Data Analytics)

Degree:
Sociology MA

Duration of training:
4 semesters (full-time training)

Language of instruction:
English

Deadline for application:
30 June

Starting date:
September

Tuition fee:
EUR 2,500 per semester

Application fee:
EUR 140

DESCRIPTION OF THE PROGRAM:

The MA program in Sociology at the University of Pécs, Department of Sociology offers students the opportunity to address social, demographic and policy issues from an applied research perspective. We focus on providing students up-to-date courses on social theories and social problems which serve as the basis for planning and conducting empirical research, utilizing quantitative and/or qualitative data from multiple sources. The goal of the program is to train experts who possess skills to address social problems and opportunities, excel in data analytics, and can visualize and communicate research results for various audiences. The applied knowledge our students gain is sought after by employers in multiple domains and is key to contemporary academic research.

Throughout the four semesters of our program, lectures and interactive seminars offer theoretical studies ranging from the classics to contemporary social theories covering key topics of sociology such as education, gender, media, urban, rural and demographic processes. Courses on empirical methods assist students in acquiring high-level knowledge in an applied setting, with a track of seminars dedicated to independent research projects covering the whole research spectrum from the formation of a study topic to the selection of research methods, their implementation in data analysis, culminating in the presentation and dissemination of research results on diverse platforms. Students looking for careers in and outside academia receive career coaching to realize their plans.

As the MA program in Sociology specializes in Data Analytics, several courses will be dedicated to the theory and application of statistical methods in academic and non-academic scenarios. Students will learn to use multiple methods at

an advanced level (such as classifiers, methods of dimension reduction and multivariate modeling techniques), and acquire strong skills in data visualization and interpretation using the R programming language among other available tools.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
Research methods, research workshop, advanced quantitative analysis, social theory classics, gender, social exclusion, education in social context
2 nd semester
Research methods, research workshop, advanced quantitative and qualitative analysis, contemporary social theory, data analytics track courses
3 rd semester
Research workshop, contemporary social theory, independent research project, career coaching (career advice, internship, reflective supervision), data analytics track courses
4 th semester
Independent research project, market and opinion research, applied social research, media, social structure, professional portfolio

For more information, please contact:

Human Ecology MA

DESCRIPTION OF THE PROGRAM:

The human ecology MA deals with complex ecological, economic, social, and ethical issues that are the most pressing problems of the contemporary world. These problems have become more and more serious in the last years, and the development and delivery of scientific, professional, and practical answers reflecting on them have become more and more urgent. The training deals with these issues at the global and local level at the same time; due to the nature of the problems, the cross-cultural search for solutions is particularly important, and the international context can clearly contribute to the birth of innovative solutions.

The goal of the program is not only to train highly qualified experts, but also to train critical citizens who can understand complex global and local processes and are able to actively participate in the development of solutions.

The training is made up of the following specializations: environmental social sciences, environmental ethics, ecological economics, and the basics of natural science. Thanks to this diverse curriculum, it is a cross-faculty program. You can learn from professional staff from the Faculty of Humanities and Social Sciences, of Business and Economics, of Law, and of Natural Sciences.

Professional practice is an important part of the training, that is related to scientific research or settlement development, environmental protection, or landscape management. Programs can be carried out in the organization of the higher education institution or at a research institute, professional administration, municipality, non-profit enterprise, or non-profit organization.

CAREER OPPORTUNITIES:

The employment opportunities are extremely diverse: human ecology specialists are employed by various budgetary institutions, municipalities, ministries, climate-friendly settlements, public and private research institutes, domestic and international NGOs, cultural centers, and national parks.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st semester

- Sustainable farming and nutrition
- Environmental Law
- Rural Societies
- Ecophilosophy
- Rural and urban eco-communities
- Introduction to Ecology

2nd semester

- Political ecology 1.: Sustainable development and environmental policy
- Local societies II.: global social inequalities
- Contemporary rural areas and their sustainable development
- Qualitative research methods
- Introduction to energy economics, energy management and energy policy
- Space, Society and Sustainability

3rd semester

- Local societies I.: metropolitan social trends
- Community development
- The Societal Context of Social Activities
- Anthropology of development
- Environmental economics
- Biogeography
- Introduction to Geography

4th semester

- Environmental Crisis, Social Justice, and Roma Ethnicity
- Political Ecology 2.: Political Socialisation
- Programme Evaluation in Human Ecology
- Environmental education
- Economic Strategies in Contemporary Villages. Research Seminar
- Nature, human and conservation

Degree:

Expert in Human Ecology MA

Duration of training:

4 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 2550 /semester

Application fee:

EUR 140

For more information, please contact:

Ms. Vanda BÖCZIN-SIRKECI | International coordinator

Balkan Studies MA

Degree:

Master of Arts in Balkan Studies

Duration of training:

2 years (4 semesters)

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 2,500 per semester

Application fee:

EUR 140

DESCRIPTION OF THE PROGRAM:

The training in the Balkan Studies Master's degree program focuses on the current problems and conditions of the region, above all from Hungarian and Central European point of view, with a multi- and interdisciplinary, as well as a critical approach. It is recommended primarily to those who want to specialize their existing qualifications, received in social sciences or humanities, with general and practical knowledge of the region, as well as with language skills. The preparedness of the teaching staff is a guarantee that our graduates can start from a strong position to find jobs in the fields of diplomacy, national security, national defense, Southeast European economy, and international NGO organizations.

EXAMPLES OF SUBJECTS DURING THE STUDIES:
1st semester

- Introduction to Balkan studies
- Space – History – Balkans
- Cultural heritage and identity in the Balkans

2nd semester

- The political and institutional system of the states of Southeastern Europe
- Relationships between ethnicity and religion, minority groups in the Balkans
- Contemporary culture in the Balkans

3rd semester

- The Ottoman conquest and its consequences
- Climate change, water policy – responses in the Balkans
- Country studies

4th semester

- Conflict zones and peace-building in the Balkans
- Field trip (current situation of the region, international environment)
- Balkan languages (Croatian, Serbian)

For more information, please contact:

Aesthetics MA (Specialisation in Classics)

DESCRIPTION OF THE PROGRAM:

The programme aims to promote an open, discursive, research-based approach to learning in Philosophies of Art in order to support your individual professional development and prepare you for advanced research or professional practice. The core module in Aesthetics consists mainly of courses that promote critical understanding of theories, contextual issues and debates in a specialist area of art. The Classics specialisation is a combination of lectures and seminars with individual tutorials and the opportunity for on-the-job training in archives and museums. It also includes field trips to relevant historical sites. The curriculum will develop your research skills and theoretical, historical knowledge in both contemporary and classical art-related fields. During their training, students of the programme can acquire highly developed critical, evaluative, reflective and communication skills. To achieve this, the curriculum uses research and writing to develop modes of questioning, speculative thinking and critical evaluation.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st semester

Core module of Aesthetics:

- Interpretation of artworks
- Theories of criticism

Classics Specialization:

- Museology
- Theories of art in Antiquity and Middle Ages

2nd semester

Core module of Aesthetics:

- Aesthetics of the 17th and 18th centuries

Classics Specialization:

- Cults and Visual Arts
- Cultural and Archaeological Heritage Protection

3rd semester

Core module of Aesthetics:

- Trends in Contemporary Art

Classics Specialization:

- Cults and texts
- Classical archaeology - art and religious iconography

4th semester

Core module of Aesthetics:

- Sociology of arts

Classics Specialization:

- Classics in popular culture
- Illicit art trade?

Degree:

Master of Aesthetics

Duration of training:

4 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 2,500 per semester

Application fee:

EUR 140

For more information, please contact:

Ms. Vanda BÖCZIN-SIRKECI | International coordinator

E-mail: foreign.humanities@pte.hu | Phone: +36 72 501 500/64127;

+36-30-1861686 | Website: <https://btk.pte.hu/en>

International and European Law MA

Degree:

Master's in International and European Law

Duration of training:

3 semesters

Language of instruction:

English

Deadline for application:

15 May

Starting date:

September

Tuition fee:

EUR 1,500 per semester

Application fee:

EUR 100

Entrance exam fee:

EUR 100

DESCRIPTION OF THE PROGRAM:

The three-semester Master's is delivered exclusively through distance learning, combining asynchronous and synchronous elements. The predominantly asynchronous format provides students with the flexibility to study regardless of their geographical location and according to their schedule. Through digital educational platforms and interactive learning materials, students maintain continuous contact with instructors and peers while accessing up-to-date legal applications and theoretical questions. The synchronous consultation sessions, on the other hand, allow students to consult with the lecturers and staff directly regarding any substantive or administrative questions. The curriculum incorporates foundational public law knowledge, international law expertise, European Union law expertise and a thesis, resulting in a well-rounded professional education.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st semester

- Public International Law
- Public Law of the European Union
- International Human Rights Law
- Law of International Organisations
- Multi-layered Constitutionalism and the Role of the States

2nd semester

- Law of Diplomatic and Consular Relations
- Protection of Fundamental Rights in Europe: The Council of Europe and the EU
- EU Internal Market Law
- EU Justice and Home Affairs Law

3rd semester

- International and EU Environmental Law*
- Introduction to the Laws of War**
- International Business Law*
- International and European Tax Law*
- European Union Criminal Law*
- International Police Cooperation**
- Master's thesis

Structural Engineering MSc

DESCRIPTION OF THE PROGRAM:

The program is designed for those who are interested in building- structure; it is open to structural engineers and civil engineers with a corresponding bachelor degree or a degree in a related field of study. The program is based on the Faculty's research of structural science and aims to provide practical and theoretical training in structural engineering. The course content focuses on developing experimental technical skills and computer usage and reflects current trends in structural analysis and design. The training covers research methods for engineers, construction project management, numerical methods, etc. Optional modules are also offered in the field of structural engineering, such as design in steel and concrete, structures and geo-technics, geotechnical engineering.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
<ul style="list-style-type: none"> - Rehabilitation of Structures - Diagnostics of Constructions
2 nd semester
<ul style="list-style-type: none"> - Seismic Design - Prestressing Technologies
3 rd semester
<ul style="list-style-type: none"> - Thin-Walled Structures - Quality Management 2 - Thesis

Degree:

Master of Science in Structural Engineering

Duration of training:

3 semesters

Language of instruction:

English

Deadline for application:

15 June

Starting date:

September

Tuition fee:

USD 4,000 per semester

Application fee:

USD 150

For more information, please contact:

Centre for International Programmes and Relations

E-mail: international@mik.pte.hu | Website: <https://english.mik.pte.hu/>

Computer Science Engineering MSc

Degree:

Master of Science in
Computer Science
Engineering

Duration of training:

4 semesters (full-time
training)

Language of instruction:

English

Deadline for application:

15 June

Starting date:

September

Tuition fee:

USD 4,000 per semester

Application fee:

USD 150

DESCRIPTION OF THE PROGRAM:

The program aims to provide engineers from technical disciplines relevant information about technology sciences as well as skills to pursue a career in computer and information engineering. The program provides a thorough understanding of theory and practice, the study of information acquisition, information systems and technical methodologies and their applications in engineering. The main areas of study include developments in intelligent systems and multi-processor technology. The program consists of a combination of formal lectures, tutorials and lab sessions; it develops practical and theoretical knowledge and includes supervised work sessions. The course aims to equip graduates with the necessary technical and academic knowledge and skills required for engineering in information technology.

EXAMPLES OF SUBJECTS DURING THE STUDIES:
1st semester

- Parallel algorithms and programming
- Large scale linear systems of equations

2nd semester

- Quantum informatics, cryptography
- Signals and systems
- Database systems

3rd semester

- Computer Vision Systems
- Robotic Systems

4th semester

- Thesis

For more information, please contact:

Centre for International Programmes and Relations

E-mail: international@mik.pte.hu | Website: <https://english.mik.pte.hu/>

Architectural Engineering MSc

DESCRIPTION OF THE PROGRAM:

This program trains students to apply their complex knowledge in the areas of architecture and urban planning, as well as in the multi-faceted field of environment formation in general (architectural design, town and country planning, preservation of built heritage, structural design, construction work, management and administration tasks, consulting with authorities, teaching, etc.) In addition, students are prepared for their professional planning license once they have gained the prerequisite practical experience as required by the relevant regulations. The final complex design project and the diploma design project are a summary, a synthesis of their studies and serve as a final assessment of their acquired knowledge. During training, studies are complemented by Scientific Students' Conference projects prepared with the co-operation of students and tutors (the latter also being in charge of supervising their work). Within the professional field of architecture, students acquire individual expertise in a specific field and can apply for admission to the DLA&PhD degree program based on their specialization. The DLA&PhD program operates within the framework of an accredited doctoral school at the institute.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
<ul style="list-style-type: none"> - Architecture 1 - Timber Structures - Architectural graphics
2 nd semester
<ul style="list-style-type: none"> - Furniture Design and History - Landscape and Garden Design 1. - Design of Building Structures 1
3 rd semester
<ul style="list-style-type: none"> - Enterprise Management - Town and Spatial Planning - Design of interior Spaces
4 th semester
<ul style="list-style-type: none"> - Thesis

Degree:

Master of Science in Architecture

Duration of training:

4 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

USD 4,000 per semester

Application fee:

USD 150

For more information, please contact:

Centre for International Programmes and Relations

E-mail: international@mik.pte.hu | Website: <https://english.mik.pte.hu/>

Interior and Spatial Design MA

Degree:
Architect (MA)

Duration of training:
4 semesters

Language of instruction:
English

Deadline for application:
30 June/10 December

Starting date:
September/February

Tuition fee:
USD 4,000 per semester

Application fee:
USD 150

DESCRIPTION OF THE PROGRAM:

The program trains interior design artists how to implement aesthetic, functional, and psychological aspects of a given space or spaces. Graduates will possess essential technical knowledge, artistic skills, have an understanding and thorough knowledge about the design thought-process and their importance during the planning procedure. They also acquire primary manufacturing-, production processes and their conditions. Students gain both practical and professional experiences throughout the course of their studies and are prepared to pursue their education in the doctoral program if they wish. Qualified interior design artists are expected to perceive complex professional issues, develop an individual design and creative program, conduct their autonomous work accordingly, as well as to employ the correct tools, methods, procedures and technologies proficiently in the creation of their own concepts and designs.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
<ul style="list-style-type: none"> - Lectures on Theory of Architectural Design 1. - Lectures on Ergonomics - Design 1
2 nd semester
<ul style="list-style-type: none"> - Social Issues of Design and Art - Urban Planning - Experimental Design Studio
3 rd semester
<ul style="list-style-type: none"> - Lectures on Environmental Psychology - Research in Interior Design - Digital Presentation
4 th semester
<ul style="list-style-type: none"> - Lectures on Research on Methods - Economic and Legal Knowledge - Complex Interior Design

Centre for International Programmes and Relations

E-mail: international@mik.pte.hu | Website: <https://english.mik.pte.hu/>

Biomedical Engineering MSc

DESCRIPTION OF THE PROGRAM:

Biomedical engineering is an emerging field that involves applying physical, chemical, mathematical, computer science and engineering principles to the analysis of biological, medical, behavioral and health-related problems. Biomedical engineers develop innovative devices and procedures to help prevent, diagnose and treat diseases. It relies on an in-depth understanding of science and engineering fundamentals, combined with a broad knowledge of physiological and anatomical systems.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1 st semester
<ul style="list-style-type: none"> - Biomechanics - Biophysics - Mathematics
2 nd semester
<ul style="list-style-type: none"> - Molecular cell biology - Medical image processing - Engineering Programming
3 rd semester
<ul style="list-style-type: none"> - Certification - Medical Cybernetics - Systemtheory
4 th semester
<ul style="list-style-type: none"> - Radiophysics - Artificial Intelligence - Genetic modification and GMO

Degree:
Master of Science in
Biomedical Engineering)

Duration of training:
4 semesters

Language of instruction:
English

Deadline for application:
30 June

Starting date:
September

Tuition fee:
USD 4,000 per semester

Application fee:
USD 150

Choir Conducting MA

Degree:

Master of Arts in Choral Conducting

Duration of training:

4 semesters (120 ECTS)

Language of instruction:

English

Deadline for application:

1 June

Starting date:

September

Tuition fee:

EUR 4,500 per semester

Application fee:

EUR 100

DESCRIPTION OF THE PROGRAM:

The activity of choral conductors holding a degree belongs to the field of choral art. It involves forming new ensembles, leading different types of choirs, actual conducting work. Basically, it means to head and manage the artistic work of a choir in the long term with high efficiency. In choral work, choral conductors can use their theoretical knowledge, their vocal and partly their instrumental abilities as well. They will be prepared to play an active role in the nourishing choral culture.

Besides general music theory and music history classes, the training will introduce students to the technique of choral conducting as well as to the theoretical and practical issues related to the human voice, voice formation and maintenance, the history of choral music, repertoire, different styles and all the related know-how in all branches of choir music. Choral conducting and learning it at a high level requires personal skills artistic sensitivity, having a good ear, knowledge of music and, most of all, the individual's singing culture and knowledge about chamber music.

EXAMPLES OF SUBJECTS DURING THE STUDIES:
Basic Module

- History of Vocal Music, Folk Music
- Musical Pieces / Performance Visiting

Professional Obligatory Module

- Piano
- Choral Education and Management

Differentiated Professional Subjects

- Conducting Techniques
- Choral Conducting
- Orchestral Conducting
- Methodology of Choral Conducting

Optional Subjects

- Theory of Art
- Art History Special Course Stylistic Knowledge
- Aural Training
- Gregorian Chant
- Medieval Polyphony

For more information, please contact:

Ms. Beáta SERES | International Relations Coordinator

Classical Musical Instrumental Performance MA

(Piano, Violin, Flute, Guitar, Viola, Cello)

DESCRIPTION OF THE PROGRAM:

The program focuses on developing music performance skills and artistic qualities on the highest level possible. These programs are for the truly committed – for those young artists who do have the aim to be on stage regularly. The goal of the program is to achieve:

- technical abilities of a real virtuoso,
- playing stability and reliability,
- detailed stylistic knowledge of all major eras and genres of classical music related to the instrument studied,
- ability to shape the musical process down to the smallest nuances and shades with ease and creativity,
- fundamental respect for the composer's instructions, put into a viable combination with the performer's own ideas and personality,

and, possibly most importantly:

- an open spirit with an honest motivation to, and ability of getting in touch with the emotional essence of the music performed, and communicating it to the audience in a straightforward yet sophisticated manner.

In addition to solo performance, chamber music also has an emphasized role in the program, with one lesson per week through all semesters, with the possibility of freely experimenting with several different ensemble formations, or studios of different chamber music teachers.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

Basic Module
<ul style="list-style-type: none"> – Music History, – Folk Music
Professional Obligatory Module
<ul style="list-style-type: none"> – Analysis – Composition – Style Studies
Studies on Professional Practice
<ul style="list-style-type: none"> – Chamber Music – Chorus / Orchestra
Differentiated Professional Subjects
<ul style="list-style-type: none"> – Major Subject (Piano, Guitar, Violin, Flute) – Performance Practice (for concerts)
Optional Subjects
<ul style="list-style-type: none"> – Instrument Knowledge – for piano major – Improvisation – for piano major – Guitar Harmony and Continuo Playing- for guitar major – Lute Tablature and Intavolation Reading and Transcription Methodology – for guitar major – Gregorian Chant – Medieval Polyphony

Degree:

Master of Arts in Classical Music Performance

Duration of training:

4 semesters (120 ECTS)

Language of instruction:

English

Deadline for application:

1 June

Starting date:

September

Tuition fee:

EUR 4,500 per semester

Application fee:

EUR 100

“University of Pécs provided me with a distinctive education experience that is greatly enriching. My lecturers who were all seasoned performers themselves were always approachable and very supportive that sustained a great studying environment. I am grateful to my lecturers for their priceless guidance. Everything in Pécs played a very significant role in shaping who I am today as a musician. “

Wei Yong Ng, Classical Music Performance MA (Piano), Malaysia

Ceramics Design MA

Degree:

Master of Fine Arts in
Ceramics Design

Duration of training:
4 semesters

Language of instruction:
English

Deadline for application:
1 June

Starting date:
September

Tuition fee:
EUR 4,500 per semester

Application fee:
EUR 100

DESCRIPTION OF THE PROGRAM:

During the Ceramics Design courses students are introduced to a wide range of silicate materials from classical materials of ceramics design up to concrete. The Ceramics Department of the Faculty of Music and Visual Arts at the University of Pécs has a close partnership with, and is located at the same site as the world famous Zsolnay Porcelain Factory in Pécs. Various types of forming methods from handcrafting to design and spacious art studios together with academic level personal tutoring provide the students with the opportunity to find their own artistic ways.

EXAMPLES OF SUBJECTS DURING THE STUDIES:
1st semester

- Contemporary Culture
- Ceramic Techniques
- Spatial Representation

2nd semester

- Cultural Anthropology
- Contemporary Silicate Arts
- Technical image

3rd semester

- Industrial Product Design
- Studio Ceramics
- Silicate Sculpture

4th semester

- Raku Firing
- 3D Scenery
- History of Design

Ms. Beáta SERES | International Relations Coordinator

E-mail: seres.beata@pte.hu | Website: <https://art.pte.hu/en>

Classical Singing MA specialising in Opera

DESCRIPTION OF THE PROGRAM:

Among other courses, the theoretical fields to be covered include Music History, Folk Music, Contemporary Culture, Analysis, but students also visit concerts and take part in composition practices. The objective of the major subject (Solo Singing) course is to establish a repertoire for the students, adequate to their vocal types and to develop their musical expression skills, knowledge on styles and recital skills. Several courses also develop a variety of skills related to acting.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

Basic Module
<ul style="list-style-type: none"> - Contemporary Culture - Music History, Folk Music - Literacy / Performance Visiting
Professional Obligatory Module
<ul style="list-style-type: none"> - Analysis Composition – Style Studies - Studies on Professional Practice - Chamber Music
Differentiated Professional Subjects
<ul style="list-style-type: none"> - Major subject (Opera singing) - Singing with piano accompaniment - Stylistic Knowledge - Acting
Optional Subjects
<ul style="list-style-type: none"> - Theory of Art - Art history - Gregorian chant

Degree:

Master of Arts in Classical Singing

Duration of training:

4 semesters

Language of instruction:

English

Deadline for application:

1 June

Starting date:

September

Tuition fee:

EUR 4,500 per semester

Application fee:

EUR 100

For more information, please contact:

Ms. Beáta SERES | International Relations Coordinator

E-mail: seres.beata@pte.hu | Website: <https://art.pte.hu/en>

Clinical Laboratory Science MSc

Degree:

Master of Science in Clinical Laboratory Science

Duration of training:
3 semesters

Language of instruction:
English

Deadline for application:
30 June

Starting date:
September

Tuition fee:
EUR 3,500 per semester

Application fee:
EUR 200

Registration fee:
EUR 100

DESCRIPTION OF THE PROGRAM:

The aim of the Master's Degree Program is to train clinical laboratory research professionals who are familiar with the general and specific rules and requirements of clinical laboratory research, and are capable of actively conducting clinical laboratory research in practice. Our aim is to train professionals who are able to conduct, organise and control the clinical trial and evaluation of medical and other therapeutic procedures and diagnostic methods. They possess the knowledge and skills which makes them capable of getting involved in the development, pre-manufacturing, and the implementation of manufacturing technologies in the field of drugs and laboratory diagnostics. They are qualified to manage clinical laboratory work. They are capable of receiving the newest implications of science and pursuing continuous education. They are able to apply their skills in practice in countries and institutions where the relevant laws, directives and protocols allow them. They are prepared to continue their education in doctoral studies.

EXAMPLES OF SUBJECTS DURING THE STUDIES:
1st semester

- Modern Methods of Protein Research
- Pathobiochemistry I.
- Molecular Genetics

2nd semester

- Neurobiology
- Clinical Pharmacology
- Experiment-based medicine
- Cellbiology

3rd semester

- Certification
- Clinical Research Theory
- Special methods of examining carbohydrates
- Clinical Research Practice

APRN Nursing MSc

(Intensive Care)

DESCRIPTION OF THE PROGRAM:

The Advanced Practice Registered Nurse (APRN) provides patient-centered safe and high quality care by partnering with patients and their caregivers. They will blend their clinical expertise with health prevention and health management and deliver a unique blend of nursing and medical care. Nurse Practitioners in Hungary will be clinicians with advanced degrees in acute and emergency care areas, and they will be able to do assessments, perform and interpret diagnostics test, set diagnoses as well as prescribe medications and other treatments. APRNs can work in their full scope of practice in the countries and in facilities where this degree is recognized on national level. A Bachelor of Nursing degree is required for entry level.

FOLLOWING FURTHER SPECIALIZATION OF THE APRN IS AVAILABLE, WITHIN THE TRAINING PROGRAM OF NURSE PRACTITIONER:

- Primary Care Nurse Practitioner

EXAMPLES OF SUBJECTS DURING THE STUDIES:

- Conceptualization and Integration of Evidence for Advanced Nursing practice
- Scientific Underpinnings of advanced Nursing Practice
- APRN Role in the Health Care delivery System
- Advanced Pharmacotherapeutic
- Advanced Health Assessment for the Nurse Practitioner
- Advanced Health Assessment and Clinical Reasoning
- Advanced Physiology and Pathophysiology
- Nurse Practitioner Practicum I.

Degree:

MSc in Nursing

Intensive Nurse Practitioner Specialisation

Advanced Practice Registered Nurse (APRN)

Duration of training:

4 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 3,500 per semester

Application fee:

EUR 200

Registration fee:

EUR 100

Physiotherapy MSc

DESCRIPTION OF THE PROGRAM:

Physiotherapist professionals during the master program may become familiar with the operation of the national health care and understand the complex institutional system, and become capable of using the results of the newest scientific researches during clinical practice. The acquired theoretical knowledge and practical skills may also provide access to further studies, such as a Doctoral program (PhD training). The master program includes and provides advanced knowledge of basic natural and social sciences, advanced pharmacological knowledge, complex musculoskeletal clinical skills, advanced neurological clinical skills, advanced clinical knowledge of cardiorespiratory system, and scientific knowledge of different physiotherapy treatments (intensive therapy, sports physiotherapy, ergo-therapy).

The master's graduates may become suitable to improve the therapeutic procedures and protocols, to recognize and analyze the physical-, anatomical-, physiological- and pathophysiological factors, to plan and execute activities and research in physiotherapy, to resolve scientific problems and trace new physiotherapy knowledge, to select and use physiotherapy-methods based on scientific evidence, to organize physiotherapy examinations in clinical environment, to lead physiotherapy units in medical institutes, to analyze scientific test results during physiotherapy activities and to move forward the health education.

A Bachelor of Physiotherapy degree is required for entry.

Degree:

Master of Science in Physiotherapy

Duration of training:

3 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 3,300 per semester

Application fee:

EUR 200

Doctoral Programs

Doctoral Program in Business Administration

Degree:

PhD in Business Administration

Duration of training:

4 semester educational period + the research period

Language of instruction:

English

Deadline for application:

15 May

Starting date:

Autumn semester (The starting of the consultation period will be announced later, it depends on the number of applicants.)

Tuition fee:

1. semester: EUR 4,000

2-4. semester:

EUR 3,000/semester

5-8. semester:

EUR 1,500/semester

Application fee:

EUR 100

Complex examination:

EUR 1,000

DESCRIPTION OF THE PROGRAM:

The International PhD Program aims at professionals in business or public administration with several years of experience within their field, but not necessarily in research or education.

The International PhD Program combines the advantages of contact-based and distance-based education drawing on the contribution of recognized national and international experts. In its design, the program combines two major international traditions in doctoral education such as the American tradition (where several years of formal education is needed to get the PhD) and the European tradition (as a rule, with a limited number of classes and a strong emphasis on independent dissertation research).

SUGGESTED RESEARCH TOPICS:

For example:

- Human resource management
- Financial Risk Measurement Theory and Management
- Decision support systems
- Health marketing
- Market entry methods in international marketing
- Floating foreign exchange rates: theory, empirics, practical relevance
- Strategic Management
- Environmental business ethics
- Entrepreneurship ecosystem measurement and research
- New approaches in marketing research
- Examination of corporate finance issues
- Organization Theory
- Operations Management

All te topics: <https://ktk.pte.hu/en/students/studies/phd-programs/iphd-program-business-administration/areas-of-research>

For more information, please contact:

Ms. Mária LAJOS | International coordinator

E-mail: lajos.maria@ktk.pte.hu | Phone: +36 72 501 599 /23160

Website: <https://ktk.pte.hu/en>

Doctoral Program in Regional Development

DESCRIPTION OF THE PROGRAM:

The PhD Program in Regional Development is for professionals who have collected several years of experience in their field, working at national, regional and local levels of decision-making or at think tank organizations. The program is designed to help students acquire the skills and knowledge necessary for writing good-quality doctoral dissertations. It supports independent research by providing experienced faculty supervisors and professional feedback at dissertation seminars.

The aim of the program is to train high-quality professionals in the field of regional development. This aim is achieved by a well-structured program that provides a strong theoretical base and at the same time supports independent research under expert supervision. The international network of the school and its professors provides many more opportunities than lectures only; the best students can apply for travel grants to conferences and for scholarships to our partner institutions abroad or they can be involved in the international projects of the

Faculty and its centre of excellence, the Regional Innovation and Entrepreneurship Research Centre.

SUGGESTED RESEARCH TOPICS:

For example:

- Regional innovation systems and regional innovation development
- Strategic management and business models
- Systemic risk and efficiency gains in global production networks
- Examining entrepreneurial and digital ecosystems

All the topics:

<https://ktk.pte.hu/en/hallgatok/tanulmanyok/regionalis-politika-es-gazdasagtan-doktori-iskola/research-topics>

Degree: PhD in Regional Development

Duration of training: 4 semester educational period + the research period

Language of instruction: English

Deadline for application:

15 May

Starting date:

September

Intake:

The starting of the consultation period will be announced later, it depends on the number of applicants.

Tuition fee:

1. semester: EUR 4,000

2-4. semester:

EUR 3,000/semester

5-8. semester:

EUR 1,500/semester

Application fee:

EUR 100

Complex examination:

EUR 1,000

For more information, please contact:

Ms. Mária LAJOS | International coordinator

E-mail: lajos.maria@ktk.pte.hu | Phone: +36 72 501 599 /23160

Doctoral Programs in Medical Sciences

Degree:
PhD

Duration of training:
4+4 semesters

Language of instruction:
English

Deadline for application:
8 May

Starting date:
September

Tuition fee:
USD 6,000 per semester

Application fee:
USD 250

Registration fee:
USD 200

DESCRIPTION OF THE PROGRAM:

The structure of the PhD programs of the Medical Faculty is similar to those of most European and American universities. The doctoral (PhD) degree, as the highest qualification attainable at university, is conferred by the University of Pécs on those who have given evidence of having acquired sufficient practical skills and theoretical knowledge to conduct scientific research independently.

GRADUATION REQUIREMENTS:

The PhD degree is conferred by the university after the candidate has completed the required courses, and defended the PhD thesis based on research work. A first authorship paper (published in a peer-reviewed journal) on the findings included in the theses, is required.

AVAILABLE PHD PROGRAMS:

- Basic Medical Sciences
- Clinical Medical Sciences
- Clinical Neurosciences
- Interdisciplinary Medical Sciences
- Pharmacological and Pharmaceutical Sciences

Doctoral Program in Health Sciences

DESCRIPTION OF THE PROGRAM:

Interdisciplinary is a major feature of our Doctoral School, as almost all sub-disciplines of Health Sciences are represented within the eligible research areas.

Our mission is to provide support to our students in their research field assisting them with their scientific work, publishing novel results, international dissemination and getting acquainted with the most recent protocols and methods. The school motivates PhD students to take part in national and international project applications. Through our international co-operations, we give our PhD students the opportunity to gain experi-

ence abroad and expand their professional and scientific contacts. The PhD students are involved in the scientific research of the supervisors and scientific members of the Doctoral School. The research topics are continuously being expanded due to the new results achieved by the PhD students. These novel results will be integrated into the research topics.

Degree:

PhD in Health Sciences

Duration of training:

8 semesters (4 years)

Language of instruction:

Hungarian and English

Deadline for application:

31 May

Starting date:

September

Tuition fee:

EUR 3,000 per semester

Application fee:

EUR 200

Doctoral Program in Biology and Sport Biology

Degree:

PhD in Biology and Sport Biology

Duration of training:

8 semesters

Language of instruction:

English

Deadline for application:

31 May

Starting date:

September

Tuition fee:

EUR 6,000 per year

Application fee:

EUR 140

DESCRIPTION OF THE PROGRAM:

The Doctoral School of Biology and Sport Biology provides PhD studies in wide range fields of biology and Sport Biology including genetics, microbiology, plant biology, ecology, regulatory biology, fitness, stress, sport and immune system. Excellently equipped laboratories are available in the biology departments and at the Szentágothai Research Center of UP, as well as at the Balaton Limnological Institute. By international contacts, we give opportunity to our PhD students to mobility.

According to our standard procedure, applicants should contact the potential supervisor(s) directly, we do not assign professors to students! The way to contact potential supervisor is to check the announced topics on www.doktori.hu and match your research interest to one of the announced topics and finally, contact the professor of the selected topic to get his/ her approval. If the professor gives you a positive reply, our International Office will be notified, too and you will be provided with a preliminary confirmation letter. This letter proves that you as an applicant is suggested to apply for the current doctoral topic and you have made a contact with a prospective supervisor prior to submitting your application. It does not enable you to become a registered PhD student without a successful entrance examination and fulfil the formal requirements.

For more information, please contact:

Doctoral Program in Chemistry

DESCRIPTION OF THE PROGRAM:

The Doctoral School of Chemistry offers a four-year training and research program in a wide range of fields in chemical sciences, Analytical Chemistry, Bioorganic Chemistry, Homogeneous Catalysis, Chemistry of Coordination Compounds, Electrochemistry, Synthetic Organic Chemistry, Theoretical Chemistry, Environmental Chemistry, Biochemistry, and Separation Science. The chemistry program began in 1993 and since then the students have had access to all modern techniques, could take part in international scientific research programs, which leads the outstanding students to obtain a PhD degree upon complying with the requirements of their studies.

According to our standard procedure, applicants should contact the potential supervisor(s) directly, we do not assign professors to students! The way to contact potential supervisor is to check the announced topics on www.doktori.hu and match your research interest to one of the announced topics and finally, contact the professor of the selected topic to get his/ her approval. If the professor gives you a positive reply, our International Office will be notified, too and you will be provided with a preliminary confirmation letter. This letter proves that you as an applicant is suggested to apply for the current doctoral topic and you have made a contact with a prospective supervisor prior to submitting your application. Doctoral Program in Earth Sciences

Degree:

PhD in Earth Sciences

Duration of training:

8 semesters

Language of instruction:

English

Deadline for application:

31 May

Starting date:

September

Tuition fee:

EUR 6,000 per year

Application fee:

EUR 140

DESCRIPTION OF THE PROGRAM:

The Doctoral School of Earth Sciences offers a four-year training and research program in various fields of geography, geology and meteorology. Students can choose from a wide selection of research topics from the three subprograms of Physical geography, geology and meteorology; Human geography; Geopolitics, Geo-economics and political geography. Outstanding students can obtain a PhD degree after completing their studies and research activities. The program began in 1994 and since then more than 100 researchers have received their PhD degree and joined the alumni network of the Doctoral School.

According to our standard procedure, applicants should contact the potential supervisor(s) directly, we do not assign professors to students! The way to contact potential supervisor is to check the announced topics on www.doktori.hu and match your research interest to one of the announced topics and finally, contact the professor of the selected topic to get his/ her approval. Doctoral Program in Physics

DESCRIPTION OF THE PROGRAM:

The Doctoral School of Physics covers the fields that are the subjects of research in the Institute of Physics; namely, laser physics, including THz and X-ray laser research, nonlinear optics, generation of ultrashort laser pulses, laser based acceleration of particles, quantum informatics, theoretical atomic and molecular physics. World-leading research on high-energy THz pulses and their applications has a strong tradition at the Institute. PhD students can take advantage of the close collaboration between the doctoral school and three institutes of the Hungarian Academy of Sciences: both the Institute for Solid State Physics and the Institute for Particle and Nuclear Physics of the Wigner Research Center, and the Institute for Technical Physics and Material Science, further the Extreme Light Infrastructure (ELI-ALPS) Institute in Szeged, as well as of several international scientific collaborators and local industrial partners. Students will be able to synthesize theoretical and empirical studies, conduct their own research, and present them both orally and in written form.

According to our standard procedure, applicants should contact the potential supervisor(s) directly, we do not assign professors to students! The way to contact potential supervisor is to check the announced topics on www.doktori.hu and match your research interest to one of the announced topics and finally, contact the professor of the selected topic to get his/ her approval. If the professor gives you a positive reply, our International Office will be notified, too and you will be provided with a preliminary confirmation letter. Doctoral Program in Law

Degree:
PhD in Law

Duration of training:
8 semesters (180 credits)

Language of instruction:
English

Deadline for application:
15 June

Starting date:
September

Tuition fee:
EUR 2,500 per semester

Application fee:
EUR 150

DESCRIPTION OF THE PROGRAM:

The doctoral program enables interested students to conduct original legal research with a major impact on both academia and legal practice. Owing to the highly qualified and motivated supervisors and the remarkable scientific network of the Faculty, doctoral students have the opportunity in any field of law and related disciplines. The Faculty offers its students great opportunities to enrich their knowledge and publish their work. Multidisciplinary or innovative research approaches are especially encouraged and supported.

"You will never get bored living and studying in Pécs. The city is clean and not crowded, along with numerous multi-cultural activities for you to experience. Life in the Campus is wonderful. The professors, teachers and staff of the University are extremely adorable. And surely, your professional career will be well-prepared by high quality study programs provided by the University of Pécs."

*Phet Sengpunya,
Doctoral School of Law, Lao PDR*

DLA in Architecture / PhD in Architectural Engineering

DESCRIPTION OF THE PROGRAM:

The primary task of the Doctoral School is to provide educational programs of a high standard in accordance with the requirements of the Bologna system to leading architects with an MSc or MA degree, as well as to those with an MA or MSc degree in an architecture-related field.

In accordance with the original mission of the Pécs Doctoral School, heritage protection has been and will be one of the main focus areas of its activities. However, the experience gained from the activities, the changing social requirements and the scientific developments have made it imperative for the Doctoral School to embrace the complex topic of sustainable architecture, especially those aspects whose research is supported by the profile of the Faculty of Engineering and Information Technology.

The Doctoral School cooperates with several Hungarian and foreign educational and research institutes. We are in the fortunate position of being part of a multi-faculty university which means we have been able to develop a close cooperation with the Faculties of Medicine, Natural Sciences, Arts, Humanities and Economics. The establishment of a jointly used research center, the so-called Science Building, is an excellent example of the fruitful cooperation of the various faculties of the university.

Besides the other Faculties of the University of Pécs, the Doctoral School also cooperates with several Hungarian and foreign institutes (e.g.: Metropolitan State University of Denver, Colorado, USA; Fachhochschule Dortmund University of Applied Sciences and Arts, Dortmund, Germany; Central Academy of Fine Arts, Peking, China)

Degree:

DLA in Architecture / PhD in Architectural Engineering

Duration of training:

8 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

USD 4,200 per semester

Application fee:

USD 150

“At University of Pécs you will have the opportunity not only to pursue a career, but also to grow as a person. Here you will be able to meet people from all around the world, you will learn new cultures, you will overcome challenges and you will feel invincible! Apart from the amazing experience of living abroad, the university offers a wide range of academic possibilities and a really good infrastructure.”

*Fernanda Marx de Andrade,
Architecture DLA, Brazil*

Psychology PhD

Degree:

PhD in Psychology

Duration of training:

8 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

1-4 semesters:
EUR 3,500 /sem.

5-8 semesters:
EUR 2,500 /sem.

Application fee:

EUR 140

DESCRIPTION OF THE PROGRAM:

The program offers graduates in psychology, biology, medicine and other social sciences the opportunity to broaden their theoretical and practical knowledge to achieve new scientific results. Courses will cover, but will be not limited to topics such as social cognition and social representation, psychophysiological measurements, and qualitative and quantitative research methods.

The study program consists of two separate blocks (Semesters 1-4, Semesters 5-8). During the first block, doctoral students master advanced research skills and take theoretical courses which help them to elaborate their own research plans and design their experiments. At the end of the 4th semester, students' knowledge and research progress is assessed by a complex examination, which is a prerequisite for continuing doctoral studies. In the second block, intensive interaction between students and their supervisors is encouraged. Students are expected to focus mainly on their research, but also participate in teaching activities in order to prepare for a carrier in an academic environment. Research results have to be published in peer-reviewed journals and presented at conferences. A doctoral thesis must be submitted not later than the end of the 8th semester. After a succesful thesis defence, the applicant will be awarded a PhD degree in psychology.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st semester

- Current topics of psychology I. (Cognitive background of person perception)
- Emerging domains of psychology I (Social representation)

- Methods of psychological research I. (Computer aided experiment design)

2nd semester

- Frontiers in Research Methodology I. (Qualitative research methods in social psychology)
- Emerging domains of psychology II. (Body representation)
- Methods of psychological research II (Narrative psychology)

3th semester

- Methods of psychological research III. (Advanced statistics)
- Current topics of psychology II. (Social identity and minorities)
- Emerging domains of psychology III. (Organizational socialization and organizational culture)

4th semester

- Emerging domains of psychology IV. (Behavioral and physiological aspects of emotion)
- Methods of psychological research IV. (Psychophysiological and EEG studies)
- Frontiers in Research Methodology II. (Methods of eye-tracking)

5th semester

- Research seminar I.
- Research and teaching practice I.

6th semester

- Research seminar II.
- Research and teaching practice II.

7th semester

- Research seminar III.
- Research and teaching practice III.

8th semester

- Research seminar IV.
- Research and teaching practice IV.

International Politics PhD

DESCRIPTION OF THE PROGRAM:

The aim of the doctoral program is to offer a wide variety of topics for the study of the actors, processes, intersections, and complexities of International Politics to those committed minds and talents who wish to foster research in any of the major relevant sub-fields in an interdisciplinary manner. The instructors and thesis supervisors of the program represent an extensive pool of expertise embracing Political Science, International Relations, International Law, Regional/Area Studies, therefore, provide substantial support to students both from methodological and theoretical perspectives. The interdisciplinary character of the program is strongly reinforced by the natural cooperation with other programs of the Doctoral School, including History, Ethnography, and Cultural Anthropology.

The program has been dynamically developing its circle of partnerships and collaborations both nationally and internationally. Doctoral students have the opportunity to join projects, take part in fieldwork, and participate in many exchange programs in different corners of the Globe. The host department also offers a wide range of scientific and intercultural events.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

1st semester

- Contemporary Theories of IR
- The Political Economy of Inequalities
- Critical Geopolitics and Globalization
- Research Design in IR

2nd semester

- Societies and Regimes in Transition
- Comparative Civil Society
- Governance in Theory and Practice

3rd semester

- Old Themes, New Challenges in Political Theory
- Cases of Development Policy Across the Globe
- Contemporary International Law

4th semester

- International Public Policy Studies
- Comparative Security Policy
- Publication in peer-reviewed journal or edited volume
- Book Review

5th semester

- Dissertation Consultation
- Paper Presentation at Summer School/Participation at Debate Academy
- Conference Paper
- Contribution to Conference/Outreach Project

6th semester

- Dissertation Consultation
- Dissertation Chapter
- Presentation 1. about the doctoral research

7th Semester

- Dissertation Consultation
- Publication in peer-reviewed journal (Qx) or edited volume
- Presentation 2. about the doctoral research

8th semester

- Internal Debate about the dissertation

Degree:

PhD in Political Science

Duration of training:

8 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 3,500 per semester

Application fee:

EUR 140

British, Irish, and American Literatures in English PhD

Degree:

PhD in British, Irish, and American Literatures in English

Duration of training:

8 semesters

Language of instruction:

English

Deadline for application:

30 June

Starting date:

September

Tuition fee:

EUR 3,500 per semester

Application fee:

EUR 140

DESCRIPTION OF THE PROGRAM:

The Program comprises two phases, the first of which consisting of three modules: core curriculum courses in the fields of literary theory, cultural studies and literary history stretching over the first three semesters; teaching, tutoring, mentoring and other department-related activities (second and third semesters); individual research for the thesis (continuous) and revision for the final exam (fourth semester). Having earned the required credits and passed the final exam, students enter the second phase, wherein they are required to finish their theses with the help of their supervisors, and submit it in two years after their final exam. The program is thus divided into two years of course-work and two years of research and writing, with tutors helping candidates all along on their way towards receiving their PhDs. As the faculty have different areas of expertise, we support individual research with a variety of focus in the fields of British, Irish and American literatures in English. In order to find out about what we teach and do research in, please check our webpage at the University of Pécs.

EXAMPLES OF SUBJECTS DURING THE STUDIES:

- Literary History
- Cultural Studies
- Individual Research
- Teaching, Tutoring and Mentoring, & Other Department-Related Activities

Preparatory courses, Postgraduate
and Non-degree Programs

Preparatory Courses in English for Degree Studies

Degree:

Non-degree course

Duration of training:

5/10/15 months (see below)

Language of instruction:

English

Deadline for application:

15 July for courses starting in September; 20 October for courses starting in January

Admission process fee:

250 EUR
(EUR 200 (Application fee) +
EUR 150 (Registration fee))

Course Books fee:

200 EUR

Output requirement:

Internationally recognized
ECL language exam (upper-
intermediate or advanced)

RANGE OF PREPARATORY PROGRAMS:

- Medical Preparatory for Biology, Dentistry, Dietetics, General Medicine, Medical Biotechnology (MSc), Midwifery, Nursing, Pharmacy, Physics, Physiotherapy
- Business Preparatory for Business Administration, Tourism & Catering
- Engineering Preparatory for Architecture, Civil Engineering, Computer Science Engineering, Electrical Engineering, Engineering Information Technologist
- Humanities Preparatory for English and American Studies, International Relations, Pedagogy BA (Intercultural Educational Assistant), Pre-School Teaching, Psychology, Social worker

Output requirement: internationally recognized ECL language exam (upper-intermediate or advanced)

GENERAL OVERVIEW OF PREPARATORY PROGRAMS

Complex and integrated preparatory programs are offered for degree studies that meet the language development needs of international students, prepare them for the academic entrance exam requirements and facilitate their integration into the context of higher education in Hungary.

Our preparatory programs are made up of three stages, each comprising 400 lessons:

1) The Milestone Stage

is designed for students who need additional support in meeting the minimum requirements in English.

2) The Upgrade Stage

focuses on language development in a manner that resembles more the academic context awaiting you. 400 contact hours are spent with thematically focused language education assisting you to attain upper-intermediate (B2) level.

3) The Gateway Stage

is specifically designed for students with outstanding English skills (already reaching or exceeding B2 level).

Program Length	Study Stages	Starting Date	Tuition Fee
5 months / 400 lessons	Gateway	January	4,200 EUR
10 months / 800 lessons	Upgrade + Gateway	September	6,500 EUR
15 months / 1200 lessons	Milestone + Upgrade + Gateway	January	9,300 EUR

Short-term Programs

Pécs Summer School 2026

In 2026, the University of Pécs is offering exciting and unique summer programs for students who want to earn credits while having fun!

SOCIAL SCIENCES

European Studies

Date: July 4-18

Description: The aim of the European Studies Summer School is to help students understand the political, economic, cultural and social accomplishments and challenges of the European Union, as well as to learn about the contributing factors that led to contemporary Europe. The interdisciplinary program provides a comprehensive introduction to the political, economic and social processes as well as the characteristics of the rich cultural heritage and cultural diversity in the European Union.

Who can apply: Undergraduate, graduate and PhD students

Program fee: 1050 EUR

Credits: 6 ECTS

Application deadline: April 1

Leadership Skills

Date: July 4-18

Description: The aim of the course is for students to become familiar with the leadership skills necessary to become effective, purposeful, and good leaders. The main topic areas include leadership styles, strategic thinking, effective communication, team building, time management, responsibility, and assertiveness.

Who can apply: Undergraduate, graduate and PhD students

Program fee: 1050 EUR

Credits: 6 ECTS

Application deadline: April 1

Sustainability – Social Ecology

Date: July 4-18

Description: This program combines lectures with hands-on experience to explore social ecology and the interconnection of social and environmental systems. By working with local NGOs, including a Community Garden and an NGO for disabled students, participants gain practical insight into building sustainable and inclusive communities.

Who can apply: Undergraduate, graduate and PhD students

Program fee: 1050 EUR

Credits: 6 ECTS

Application deadline: April 1

LAW

International Human Rights Law

Date: July 4-18

Description: This summer school will address some of the most topical issues in this context, including but not limited to the protection of human rights in armed conflicts, the accession of the EU to the European Convention on Human Rights, the right to asylum versus national security, the human rights implications of AI systems and algorithmic decision-making, etc.

Who can apply: Law students

Program fee: 1450 EUR

Credits: 6 ECTS

Application deadline: April 1

DEBATE

Debate Academy

Date: July 19 – August 2

Description: The program provides students with an introduction to argumentation theory, rhetoric, and practical skill-building exercises in debate and public speaking. The theories discussed in the course are connected to present-day issues and students' personal research interests. Debate is a formal method of interactive and representational argument. With its focus on logical consistency, factual accuracy, originality of arguments and to some degree of emotional appeal to the audience, debating develops the art of persuasion.

Who can apply: Undergraduate, graduate and PhD students

Program fee: 1050 EUR

Credits: 6 ECTS

Application deadline: April 1

Customized Summer and Winter Programs

Organized for our partner institutions

THE UNIVERSITY OF PÉCS OFFERS CUSTOMIZED STUDY PROGRAMS IN THE FOLLOWING FIELDS:

- Business
- Law
- Social Sciences
- Engineering
- Architecture
- Health Sciences
- Natural Sciences
- Music and Arts

4-WEEK SUMMER SCHOOL OPPORTUNITIES

Date: July 4 – August 2

Description: Combine one of our academic summer schools with the Debate Academy for a truly transformative experience. Spend two weeks gaining in-depth knowledge in your chosen field, followed by two weeks of intensive debate and public speaking training. Earn 12 ECTS credits while enhancing both your academic expertise and practical communication skills.

Who can apply: Undergraduate, graduate and PhD students

Credits: 12 ECTS

Our customized summer and winter courses are designed to provide vigorous educational experiences in a safe, friendly environment and meet the educational needs of student groups from select partner universities. Our unique tailor-made programs provide students the opportunity to combine education with cultural immersion, while earning credits towards their degrees.

The summer and winter courses are developed to broaden students' knowledge in their academic fields of study, but students will also gain enriching, first-hand experiences in Europe while being immersed in the unique and welcoming Hungarian culture.

The length of the programs is tailored to the specific requirements of our partner universities, which can last from one to eight weeks. All participants receive a certificate of completion at the end of the program.

Study Abroad programs for incoming students

The University of Pécs offers a wide range of semester/year-long, high quality Study Abroad Programs for the incoming international students who are already enrolled in university, that explore different topics in various educational fields.

Our Study Abroad programs enable you to combine a period of residence abroad with an educational program for which you will gain academic credits towards your degree in your home university.

THE FOLLOWING SEMESTER/YEAR-LONG STUDY ABROAD PROGRAMS ARE AVAILABLE IN ENGLISH:

Architectural Engineering BSc	Business Administration BA	Management and Leadership MSc
Business Development MSc	English and American Studies BA	Psychology BA
International Relations	Human Resources Counseling MA	English Studies MA
Social Work BA	Pharmacy (Pharm.D.)	Communications and Media
Education (Pedagogy) BA	Physiotherapy BSc	Nursing BSc
Archaeology BA	Ceramic Design MA	Physical Training BSc
Dietetics BA	Natural Sciences on BSc level	Liberal Arts BA
Classical Music Performance BA/MA	Legal Issues in an International Context	Sculpture (OTM)
Painting (OTM)		

One program consists of 3–5 different courses. One course represents 4-9 ECTS credits per semester. The tuition fees of the Study Abroad programs range from 2600 to 3300 USD per semester depending on the chosen area of study.

PERIOD OF STUDY

The first step is to decide how long you wish to study abroad. There are three possible study options we can offer you:

Study option	Length	Study period
1.	Whole academic year	September – June
2.	Autumn (fall) semester	September – December
3.	Spring semester	February – June

The University's standard academic year runs from September to June, with teaching taking place in two semesters.

“My experience in University of Pécs as an international student can be described in a 3 words: insightful, joyful and unique. Insightful because I have a chance to learn from experienced and skillful professors about my major of studies. Joyful for interesting opportunities city provides to socialize. Uniqueness stands for the fact, that there is no other study destination that feels cozy like home”

Khubon Iskhakova, Tajikistan, Faculty of Business and Economics, Business Administration and Management BSc

Why Choose the University of Pécs?

If you choose the University of Pécs you will...

...experience a **high quality of teaching**.

...study at **the oldest university in Hungary** - founded in 1367 - having exceptionally wide-ranging experience and long-standing traditions in higher education.

...be awarded a valuable **EU degree**.

...choose from our professionally relevant and high quality programs for a tuition fee that represents **great value for money**.

...study in a **multicultural environment**.

...enjoy **low living expenses**.

...experience **vibrant student life** day and night in this true University City, full of bars, restaurants and cafés.

...study at **one of the largest higher education institutions in Hungary** together with 25,000 other students.

...live in a uniquely beautiful place - Pécs was awarded the prestigious title "**European Capital of Culture**" in 2010.

...walk among the historical buildings in the city of Pécs, which is part of the **UNESCO World Heritage**.

...study in a very **safe and friendly** city located in one of the safest countries in Europe.

...get a **Central European experience** and discover further European countries easily during your studies at UP.

More than
5,700 
international students

The growing number of our international students is the best proof and guarantee of the advantages offered by our institution.
