INDONESIAN INTERNATIONAL STUDENT MOBILITY AWARDS 2022

Course syllabus

Title:	EU ENVIRONMENTAL POLICY AND LAW
Credit points (ECTS):	6
Term:	Fall
Module leader:	Dr. Attila Pánovics
Aims:	<p>The aim of the course is to provide a comprehensive insight into the theory and practice of EU environmental policy and law. It aims to make a contribution to the understanding of the strengths and weaknesses of the EU in environmental matters, and the dual responsibility of the EU institutions and the Member States.</p>
Learning outcomes:	<p>Upon completion of this module, participants will understand the role model of the EU in global environmental governance, the special features of EU environmental policy and law, and the relationship between environmental policy and other activities of the Union. They will have a better understanding of the complexities of environmental issues, and the challenges EU member countries and the international community face related to the ongoing climate crisis.</p> <p>Participants of the module will get theoretical and practical skills related to environmental protection, and will be able to explain and critically analyze environmental cooperation at regional level.</p>

Learning and teaching strategy:

The module consists of lectures, the methods will include classroom discussions and student presentations. Active student participation and contribution is expected. The final evaluation will be based on students' continuous contribution, including their presentations. The module requires students to comment on each other's presentations and discuss new environment related cases.
