

EDUC Research Internships

Host a European student in your laboratory or research team
from one week to 6 months

Our ambition

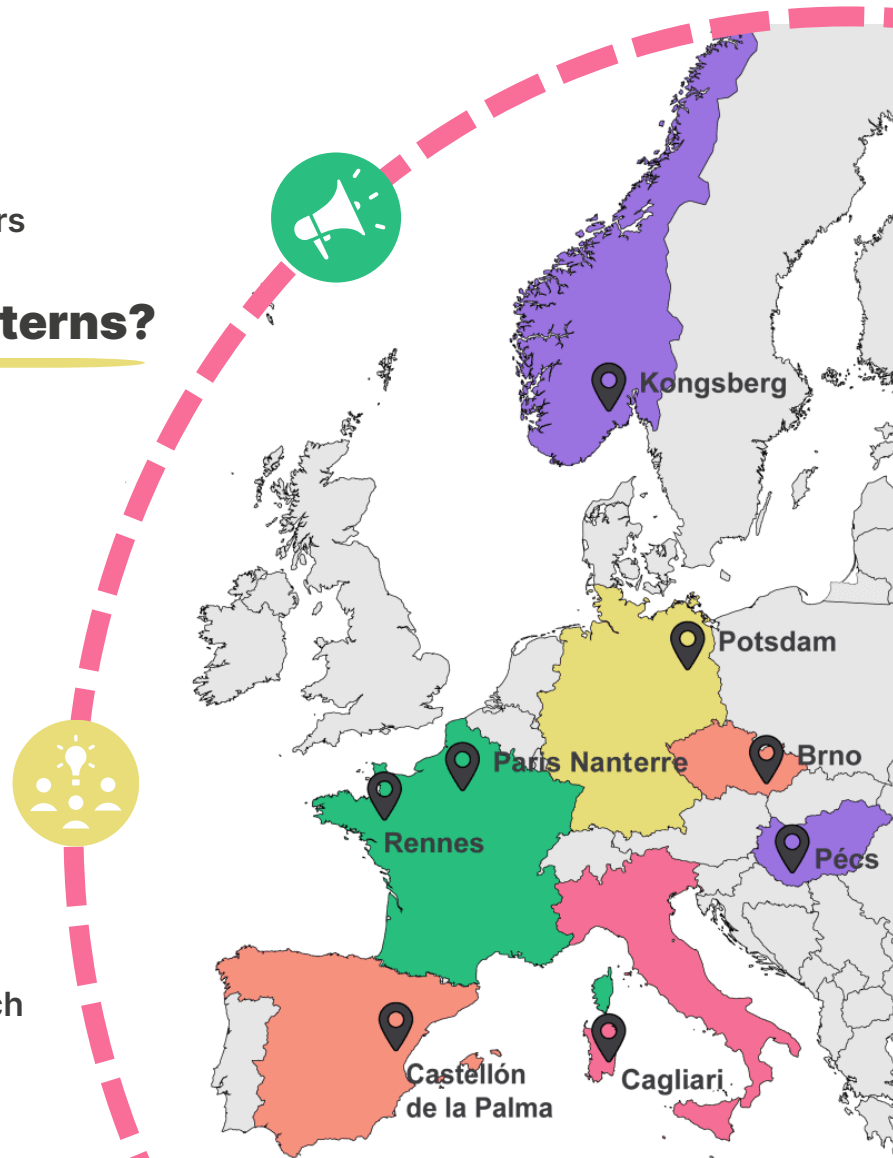

Create a European platform to develop
research internships opportunities
Attract more students to research careers

Why host EDUC research interns?

- Identifying potential future PhDs and develop joint PhD projects
- Receiving motivated students (EDUC preselection)
- Enabling your PhDs to train interns and share their research
- Passing on your knowledge to train tomorrow's European researchers
- Developing or strengthening research collaborations within the alliance
- Consolidating your international research teams

Benefits for students

- Discovering the activities of a research laboratory and its teams
- Acquiring the scientific method and practical skills
- Enhancing soft skills, real assets for professional integration
- Developing a professional network in Europe
